

NOTES

This drawing represents the traffic management proposal for carrying out the second stage of the public road improvement (PRI) works between A82 Fort Augustus (Three Bridges) and the Auchterawe Substation. Further consultation including a letter drop to all affected residents will be undertaken prior to works, giving additional details on expected time scales.

The second stage of works will involve working within Phases C, D, E and F as described. The works will include passing place improvement, resurfacing of the road from Jenkins Park Junction to Auchteraw. The works will be managed to maintain access if and where possible however road closures will be required. The community will be advised of the timing of these closures with mitigation measures put in place where possible.

Phases C, D, E and F
There is insufficient corridor width for working area, safety zone and vehicular access through these phases therefore the works will require a full road closure. The closure will be managed to suit local residents with consultation carried out in advance of the works. This phase will include overnight working. Undertaking the works overnight will minimise the impact on local residents.
