

Legend

- Proposed OHL Towers
- Indicative Proposed Alignment
- SPEN Existing Towers
- ▲ SPEN Temporary Diversion Towers
- SPEN Existing 275kV Overhead Line (Scottish Power Energy Networks)
- SPEN Temporary Diversion OHL
- 250 m Field Study
- 2 km Desk Study

The desk study area includes the potential for downstream impacts on the water environment and therefore extends to the receiving waters into which the watercourses within the field study area discharge. These are predominantly Loch Awe and Loch Fyne at the southern extent of the Proposed Development. The Study Area for geology and soils has been limited to the developable areas of the Proposed Development.
