

Scottish & Southern
Electricity Networks

The powerline crosses a small strip of low density broadleaves located at Brackley Farm. This will have an insignificant landscape impact and does not require a full appraisal.

The powerline crosses a small area on the margins of Kinachrechan. The landscape impact will be low due to the route alignment and the existing forest structure.

The powerline crosses a small area on the margins of Strone Hill. The landscape impact will be low due to the route alignment and the existing forest structure.

The powerline crosses a small strip of low density broadleaves located at Achlian. This will have an insignificant landscape impact and does not require a full appraisal.

Significant Properties

A: Creagan & Cabrach
B: Dychliemore
C: Bovuy
D: Keppochan East & Tullich

**LT000029: Creag Dubh to Dalmally
275kV OHL Connection**

Appraisal & Mitigation of Forestry
Landscape Impacts
