

# Kickstart your career with SSEN Transmission

Student and graduate programmes

# Student and Graduate Programmes

## Summer Placement Programme

You will be part of our engineering, project management or commercial teams for a period of 3 months to gain knowledge and experience of Transmission and the energy industry.

Supported by your line manager, there will be workshops, external sessions and network opportunities to aid your commercial awareness of the energy sector.

**12 week programme**  
Circa £24,580 starting salary

Post Programme: view for them to join on the graduate programme or future summer placements.

**Qualifications required:**

- Working towards a degree in a relevant discipline
- Applications open to those in their first to final year

## Graduate Programme

You will be part of our engineering, project management or commercial teams for a period of 2 years to gain knowledge and experience to develop you into your substantive role

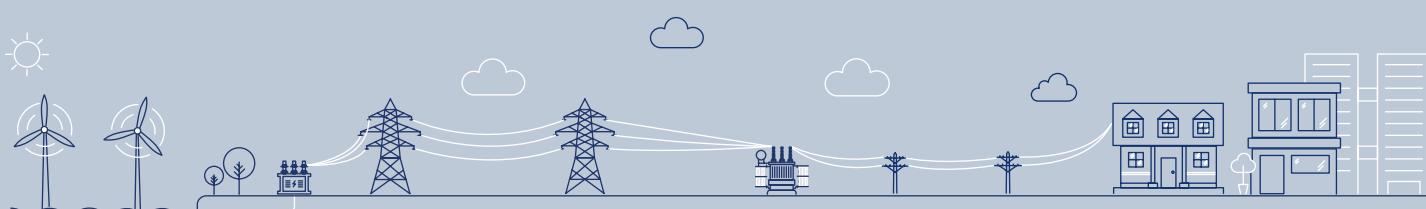

Supported by your line manager, there will be workshops, external sessions and network opportunities to aid your commercial awareness.

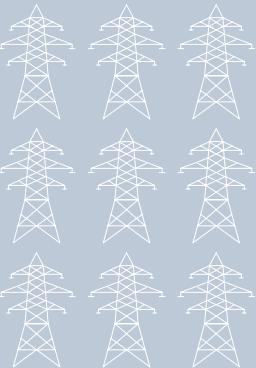

The programme consists of either a 'generalist' or 'specialist' route. The 'specialist' programme structure is formed of multiple placements across the business to offer the graduate the opportunity to better understand the Transmission life-cycle and how their substantive post fits into this. The 'technical' programme structure consists of limited placements to allow the graduate to focus on the technical skills needed for their substantive post.

**2-year programme**  
Circa £34,000 starting salary  
Post Programme Salary: Circa £38,000 - £45,000 dependent on role

**Qualifications required:**

- Achieved a minimum 2:2 degree in a relevant discipline
