

Beauly to Blackhillock to New Deer to Peterhead 400kV OHL Project

Final overhead line alignment pre-application events

Scottish & Southern
Electricity Networks

TRANSMISSION

We are hosting a series of public events across the project route from 17 February until 6 March 2025. These events conclude the Pre-Application Consultation (PAC) process for the consent application that will be submitted under section 37 of the Electricity Act 1989.

Email: BBNP@sse.com

To support the growth in renewable developments across the north of Scotland, investment in our network infrastructure is needed to connect this power and transport it to areas of demand. This includes a new 400kV overhead line between Fanellan (near Beauly) and Netherton Hub (near Peterhead), connecting into new substations, Coachford (near Blackhillock) and Greens, (near New Deer).

We will be sharing our Proposed Alignment of the overhead line, including details on how this was developed. This will be presented on maps and visualisations with handouts available. Digital versions will also be available on our project webpage.

Interested parties can attend these drop-in events to view and discuss plans ahead of the consent application later in 2025. Feedback can be provided via forms available at the events, the online form on our project webpage or via email to the project inbox. The comments period will be open until **21 March**.

Please note: Any comments made to us as the Applicant are not representations to Scottish Ministers as the decision makers. There will be opportunity to make formal representations to Scottish Ministers via the Energy Consents Unit following the submission of the section 37 application.
