Notes:

- The following images provide landscape and visual context only.
- View photomontages flat and at a comfortable arm's length. If viewing these images on a wall or board at an exhibition, you should stand at arm's length from the image presented.
- A visualisation can never show exactly what the Proposed Development will look like in reality due to factors such as: different lighting, weather and seasonal conditions which vary through time and the resolution of the image.
- The images provided give a reasonable impression of the scale of the towers and the distance to the towers, but can never be 100% accurate.
- To form the best impression of the impacts of the proposal these images are best viewed at the viewpoint location shown.
- The viewpoints illustrated are representative of views in the area, but cannot represent visibility at all locations.
- The images must be printed at the right size to be viewed properly (260mm by 820mm).
- If viewing photomontages on screen enlarge to full screen to gain an overview, enlarge to 100% to have a reasonable impression of the size of the development in the view.
- Vertical Limit of Deviation: the maximum height of a tower above ground level.
- The following images are type 3 visualisations and have been produced in accordance with Landscape Institute Technical Guidance Note 06/19 and NatureScot - Visual Representation of Wind Farms Guidance Version 2.2 - February 2017.
