
Location Plan

Key

- Proposed Tower 400 kV
- Proposed Tower - Existing OHL Works (275 kV Realignment and Crossing)
- Proposed Tower - Temporary
- Transposition Towers
- Proposed OHL Alignment 400 kV
- Temporary OHL Diversion
- Proposed Alignment - Existing OHL Works (275 kV Realignment and Crossings)
- OHL to be Removed
- 90˚ Field of View
- 53.5˚ Field of View

Notes:

-The following images provide landscape and visual context only.

-View photomontages flat and at a comfortable arm's length. If viewing these images on a wall or board at an exhibition, you should stand at arm's length from the image presented.

-A visualisation can never show exactly what the Proposed Development will look like in reality due to factors such as: different lighting, weather and seasonal conditions which vary through time and the resolution of the image.

-The images provided give a reasonable impression of the scale of the towers and the distance to the towers, but can never be 100% accurate.

-To form the best impression of the impacts of the proposal these images are best viewed at the viewpoint location shown.

-The viewpoints illustrated are representative of views in the area, but cannot represent visibility at all locations.

-The images must be printed at the right size to be viewed properly (260mm by 820mm).

-If viewing photomontages on screen enlarge to full screen to gain an overview, enlarge to 100% to have a reasonable impression of the size of the development in the view.

-Vertical Limit of Deviation: the maximum height of a tower above ground level.

-The following images are type 3 visualisations and have been produced in accordance with Landscape Institute Technical Guidance Note 06/19 and NatureScot - Visual Representation of Wind Farms Guidance Version 2.2 - February 2017.

Specific to:

Recreational & Amenity receptor: visitors to the Cairngorms National Park and users of 'Via Regia' Heritage Path (THC-REC-23 & MOR-REC-5).

This visualisation has been identified and created for use with the visual impact assessment, but can also be used to inform landscape impacts on LCT291 Open Rolling Upland and the Cairngorms National Park.

For visual receptor and viewpoint locations refer to **Volume 3: Figure 7.6 Visual Amenity Receptors and Viewpoint Locations** and **Figure 7.7 Visual Context.**
