

Join the Cambushinnie Community Liaison Group

Cambushinnie 400kV Substation and Haul Road Project

SSEN Transmission is inviting members of the Braco and Greenloaning community to help shape the creation of a new **Community Liaison Group (CLG)** for the Cambushinnie 400kV Substation and Haul Road Project.

What is a Community Liaison Group?

The CLG will provide an opportunity for local people, community organisations and project representatives to meet regularly, share information and discuss project-related matters throughout the construction phase of the project. It will help ensure local views and concerns are heard and understood, and encourage collaborative engagement as the project progresses.

Who can take part?

We are keen to establish a group that reflects the broad range of interests within the local community and welcome expressions of interest from:

- Community Council representatives
- Local ward councillors
- Representatives from community organisations and local groups
- Local residents and business representatives

Proposed meeting arrangements

The CLG is expected to meet every two months initially, in-person at a local venue.

Interested in getting involved?

Contact our Community Liaison Manager:
