AECOM Limited ("AECOM") has prepared this Statement for the sole use of SSEN Transmission ("Client") in accordance with the terms and conditions of appointment (ref no: 1223039921) dated 29 September 2023 ("the Appointment").

AECOM shall have no duty, responsibility and/or liability to any party in connection with this Statement howsoever arising other than that arising to the Client under the Appointment. Save as provided in the Appointment, no warranty, expressed or implied, is made as to the professional advice included in this Statement or any other services provided by AECOM.

This Statement should not be reproduced in whole or in part or disclosed to any third parties for any use whatsoever without the express written authority of AECOM. To the extent this Statement is reproduced in whole or in part or disclosed to any third parties (whether by AECOM or another party) for any use whatsoever, and whether such disclosure occurs with or without the express written authority of AECOM, AECOM does not accept that the third party is entitled to rely upon this Statement and does not accept any responsibility or liability to the third party. To the extent any liability does arise to a third party, such liability shall be subject to any limitations included within the Appointment, a copy of which is available on request to AECOM.

Where any conclusions and recommendations contained in this Statement are based upon information provided by the Client and/or third parties, it has been assumed that all relevant information has been provided by the Client and/or third parties and that such information is accurate. Any such information obtained by AECOM has not been independently verified by AECOM, unless otherwise stated in this Statement AECOM accepts no liability for any inaccurate conclusions, assumptions or actions taken resulting from any inaccurate information supplied to AECOM from the Client and/or third parties.

1. Introduction

1.1 Background

1.1.1 This document has been prepared by AECOM and comprises a Transport Statement (TS) to accompany non-statutory Environmental Assessment Traffic and Transport chapters for the Proposed Developments. The Proposed Developments covered in this TS are:

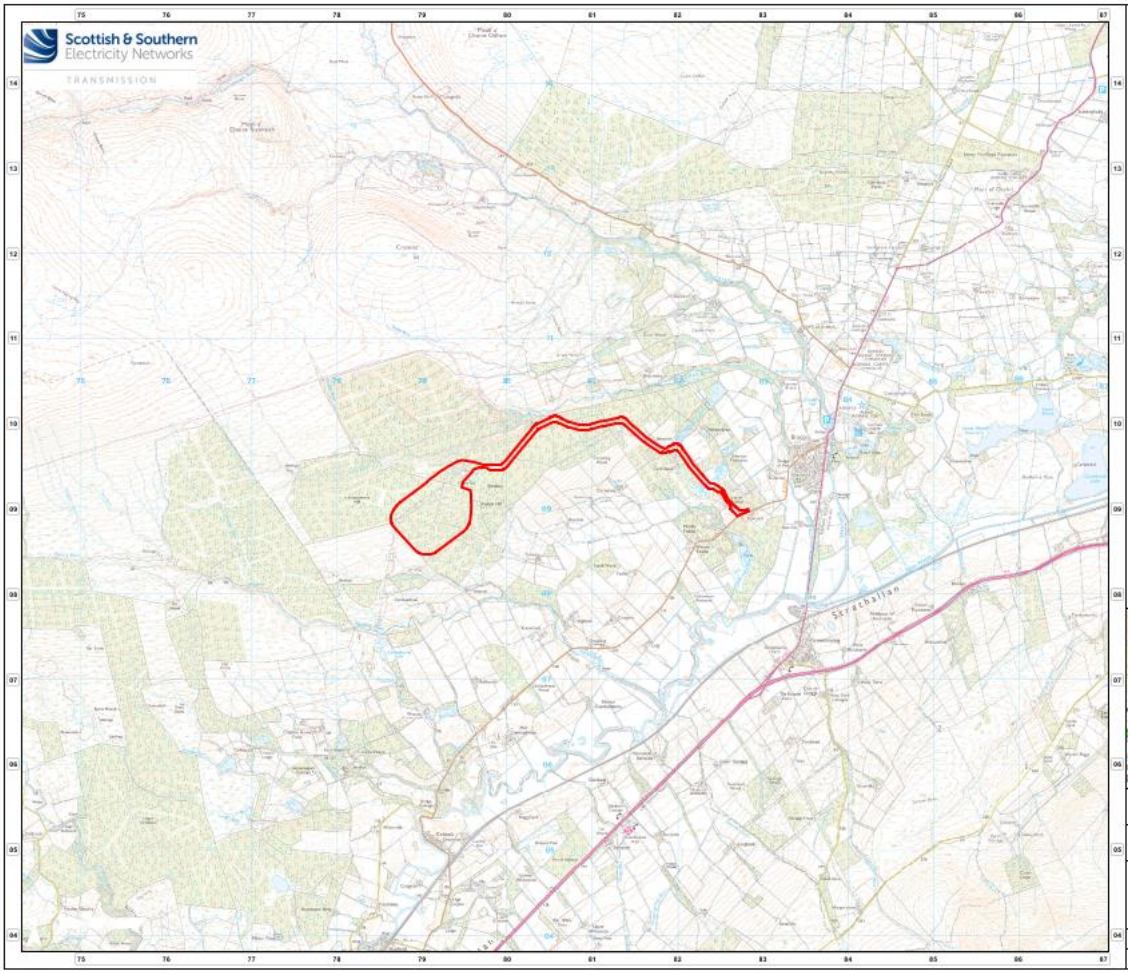
- Cambushinnie 400 kV substation; and
- Cambushinnie Overhead Line (OHL) tie-ins.

1.1.2 This project forms one of the elements of the projects required to be delivered as part of the Accelerated Strategic Transmission Investment (ASTI) project for the upgrade of the second Beauly – Denny 275 kV circuit to 400 kV. The Proposed Developments and associated developments include Cambushinnie 400kV Substation, Overhead Line Tie-ins, Haul Road and Underground Cable Route, collectively these are referred to as 'the Project'.

1.2 Site Location

1.2.1 The Site Location Plan is illustrated in **Figure 1-1** below. In the context of this Transport Statement, the Proposed Development encompasses the two elements listed above. The project in its entirety also encompasses a permanent haul road, located to the south of Braco, connecting the A822 and B8033, . The Cambushinnie 400 kV substation, OHL tie-ins and Underground Cable (UGC) route are located immediately adjacent to the existing Beauly-Denny OHL, approximately 250 m southwest of the existing Braco West Substation, and approximately 3.5 km west of Braco village.

Figure 1-1 Site Location Plan



1.3 Scoping Correspondence

1.3.1 AECOM has engaged with the local roads authority which in this instance is Perth and Kinross Council (PKC) as well as Transport Scotland due to the anticipated involvement of the trunk road network. Scoping correspondence has been included within **Appendix A Scoping Correspondence** of this report.

2. Legislative and Planning Policy Context

2.1 Introduction

2.1.1 In accordance with the development planning process, the Proposed Development is required to comply with various national, regional and local transport planning policies. This section, therefore, incorporates a brief overview of the relevant policy and strategy documents and highlights how the Proposed Development satisfies these policies. In addition to this, relevant aspects of specific transport guidance are also detailed.

2.2 National Transport Policy, Strategy and Guidance

National Transport Strategy NTS2 (2020)[2]

2.2.1 NTS2 sets out an ambitious and compelling vision for Scotland's transport system for the next 20 years. The vision is to have a sustainable, inclusive, safe, and accessible transport system, helping to deliver a healthier, fairer, and more prosperous Scotland for communities, businesses, and visitors.

2.2.2 Four priorities support the vision:

- Reduce inequality;
- Take climate action;
- Help deliver inclusive economic growth; and
- Improve health and wellbeing.

National Planning Framework 4 (2023)[3]

2.2.3 The National Planning Framework 4 (NPF4) was adopted by the Scottish Ministers on 13 February 2023, following approval by the Scottish Parliament in January. This replaces National Planning Framework 3 (NPF3) 2014, Scottish Planning Policy (SPP) 2014 and Regional Plans and is now part of the statutory development plan for Perth and Kinross, along with the Local Development Plan (LDP)[4].

2.2.4 The NPF4 sets out overarching spatial principles to support the planning and delivery of the three key National Planning Policy areas:

- Sustainable Places;
- Liveable Places; and
- Productive Places.

2.2.5 Tackling the climate and nature crises, through climate mitigation and adaptation, sits front and centre within the policies of the NPF4. Sustainable transport (Policy 13) plays a vital role in creating sustainable places and responding to the climate emergency.

Transport Assessment Guidance (2012)[5]

2.2.6 Transport Assessment Guidance (TAG), produced by Transport Scotland in 2012, provides guidance and information as to the content, methodology and approach of Transport Assessments (TAs), Transport Statements and Travel Plans produced in support of development sites. It details the importance of establishing the existing transport infrastructure and travel characteristics, as well as the development proposal itself and the measures which will be included to improve infrastructure and services to encourage sustainable travel to the Proposed Development.

Planning Advice Note (PAN) 75 – Planning for Transport (2005)[6]

2.2.7 Planning Advice Note (PAN) 75 – Planning for Transport is a planning circular produced by the Scottish Government which provides good practice on planning and transport. This includes guidance on integrating transport, transport modelling, policy development, development management, planning agreements and environmental assessment.

2.2.8 In terms of TAs and Transport Statements, it states in Paragraph 41 that "*all planning applications that involve the generation of person trips should provide information which covers the transport implications of the development*." It identifies that for smaller developments, "*the information on transport implications will enable local authorities to monitor potential cumulative impact.*"

2.2.9 PAN 75 also provides guidance on the preparation of Travel Plans (TP). Paragraph 42 states that they are "*documents that set out a package of positive and complementary measures for the overall delivery of more sustainable travel patterns for a specific development*." For detailed planning applications, it identifies that the TP produced should "*incorporate a variety of measures and targets to encourage sustainable travel, such as Mode Share Targets, an implementation time scale and an agreed monitoring and review process*." A Framework Construction Traffic Management Plan (CTMP) has been incorporated within **Section 6** of this report.

2.3 Regional Transport, Policy, Strategy and Guidance

2.3.1 The Transport (Scotland) Act 2005 placed a statutory duty on the seven Regional Transport Partnerships (RTPs) in Scotland to produce a Regional Transport Strategy (RTS) for their area. The RTS influences all of the future plans and activities of the organisation and informs future national and local transport strategies. Perth and Kinross is within the Tayside and Central Scotland Partnership (Tactran) region.

Draft Tayside and Central Scotland Regional Transport Strategy 2024-2034[7]

2.3.2 Tactran have worked on a new Tayside and Central Scotland RTS to address the challenges and opportunities that have arisen since 2015. This is now in the final draft stage which has been submitted to the Minister for Transport for approval.

2.3.3 The RTS is a plan for identifying strategic transport priorities for the Angus, Dundee City, Perth and Kinross and Stirling Council areas. The RTS identifies four strategic objectives which mirror those in Scotland's National Transport Strategy, which are:

- Take climate action;
- Improve health and wellbeing;
- Reduce inequalities; and
- Help deliver inclusive and sustainable growth.

2.3.4 The Proposed Development will seek to manage both the construction and operational phases in the most efficient and safe way possible to ensure that it aligns with the RTS.

Tactran Regional Transport Strategy Refresh (2015-2036)[8]

2.3.5 The Tactran RTS Refresh was approved by the Minister for Transport and Islands in July 2015. The objectives of the RTS are to:

- Economy - Ensure transport helps to deliver regional prosperity;
- Accessibility, Equity and Social Inclusion – To improve accessibility for all, particularly for those suffering from social inclusion;
- Environment – To ensure that the transport system contributes to safeguarding the environment and promotes opportunities for improvement;
- Health and Wellbeing – To promote the health and wellbeing of communities;
- Safety and Security – To improve the real and perceived safety and security of the transport network; and
- Integration – To improve integration, both within transport and between transport and other policy areas.

2.4 Local Transport Policy, Strategy and Guidance

Perth and Kinross Local Development Plan (2019)[4]

2.4.1 The PKC LDP was adopted by PKC in 2019 and sets out the Council's policies and proposals to guide development across the area up to 2029. The vision for the LDP is that:

"to promote sustainable economic growth and sustainable development by building upon the special qualities of our area that make it an attractive place to live and do business, whilst at the same time recognising the importance of 'placemaking' and protecting our most valuable assets.."

2.4.2 Policy 60 entitled 'transport standards and accessibility requirements' sets out the requirements that new developments should adhere to from a transportation perspective. This states that:

"All development proposals that involve significant travel generation should be well served by, and easily accessible to all modes of transport. In particular the sustainable modes of walking, cycling and public transport should be considered, prior to private car journeys. All development proposals should:

- Be designed for safety and convenience of all potential users;
- Incorporate appropriate mitigation on-site and / or off-site, provided through developer contributions where appropriate, which might include improvements and enhancements to the walking / cycling network and public transport services including railways and level crossings, road improvements and new roads;
- Incorporate appropriate levels of parking provisions not exceeding the maximum parking standards laid out in SPP, including maximum on-site parking standards to help encourage and promote a shift to the more sustainable modes of travel of walking, cycling and public transport;
- Fit with the strategic aims and objectives of the Regional Transport Strategy and the Tay Cities Deal; and
- Support the provision of infrastructure necessary to support positives changes in Low and Ultra Low Emission Vehicle transport technologies, such as charging points for electric vehicles, hydrogen refuelling facilities and car clubs, including for residential development.

[8] Tactran, 2015. *Regional Transport Strategy 2015-2036 Refresh* [online]. Available from: RefreshofRegionalTransportStrategyMainIssuesReport-Final.pdf [Accessed February 2025]

3. Baseline Transport Characteristics

3.1 Introduction

3.1.1 This section provides an overview of the characteristics of the Site at present as well as the baseline characteristics of the surrounding transport network.

3.2 Vehicular Conditions

3.2.1 Vehicle access to the Site will be via the existing road network as well as a permanent haul road which will be constructed for use of Proposed Development construction traffic. Study area roads will include the A9, B8033 and A822 and local roads in the immediate environs of the Proposed Development.

3.2.2 The A822 routes through Braco north-south between the A9 and Crieff. It is a single carriageway road which is predominantly rural in nature. National speed limits apply to the A822 outside of the urban environs on its route, and a 40 mph speed limit applies within Braco and Greenloaning. The A822 will be the route used by construction traffic between the A9 trunk road and the proposed haul road.

3.2.3 The B8033 routes north to south parallel to the A822 and A9 between Braco and Dunblane. National speed limits of 60 mph apply to the route outside of urban environs on its route which is largely rural in nature. The route has some rural property frontage and is also lightly used by recreational cyclists. The B8033 will not be used by Substation and OHL construction traffic given the haul road will be operational.

3.3 Baseline Traffic Flows

3.3.1 Traffic surveys were undertaken on the local road network at locations agreed with PKC prior to commencement. The traffic survey data is supplemented by traffic data obtained from publicly accessible Department for Transport (DfT) counters. The traffic surveys consisted of automatic traffic counts (ATC) and junction turning counts (JTC) which took place during the 7-day period between the 16 April 2024 and 22 April 2024. ATCs were undertaken at seven locations, recording data for a seven-day period while JTCs were undertaken at three locations on the 16 April 2024 and were recording data between the hours of 07:00 – 10:00 and 14:00 – 19:00.

3.3.2 The locations of the traffic surveys are shown in **Appendix B Survey Locations** and are summarised below as follows:

- A822 – four Automatic Traffic Counter surveys and one junction turning count survey;
- Feddal Road / B8033 – three Automatic Traffic Counter surveys;
- Millhill Road – one Automatic Traffic Counter survey and two junction turning count surveys; and
- A9 (T) – two DfT counters, counter 724 and counter 20730.

3.3.3 The full output of the data collected and used on the non-statutory Environmental Appraisal (EA) chapters are presented in **Appendix C Traffic Survey Data**. The results of the ATC surveys and the DfT counter data are summarised in **Table 3-1** below.

Table 3-1 Cambushinnie ATC Data - Annual Average Daily Traffic (AADT)

ATC	Location	Light Vehicles	Heavy Vehicles	Total Vehicles
ATC1	A822 (North of A822 / Feddal Road Junction)	3,846	98	3,944
ATC2	A822 (South of A822 / Feddal Road Junction)	4,111	118	4,229
ATC3	Feddal Road (West of A822 / Feddal Road Junction)	779	17	796
ATC4	A822	4,303	77	4,380

ATC	Location	Light Vehicles	Heavy Vehicles	Total Vehicles
	(At Permanent Haul Road)			
ATC5	A822 (North of A9)	4,192	85	4,277
ATC6	Millhill Road (Between A9 and A822)	522	12	534
ATC7	B8033 (Easter Feddal)	387	15	402
ATC8	B8033 (Craighead)	257	9	266
DfT Counter 724	A9 North of Greenloaning Junction	27,235	2,877	30,112
DfT Counter 20730	A9 South of Greenloaning Junction	23,029	3,362	26,391

Source: ATC and DfT

3.4 Traffic Growth Forecast

3.4.1 To provide an appropriate baseline against which to compare forecast construction traffic flows, it has been necessary to apply a growth factor to the 2024 traffic survey data to arrive at anticipated baseline flows during peak construction periods. These are anticipated to occur at:

- Proposed Cambushinnie 400 kV Substation – 2027; and
- Proposed Cambushinnie OHL tie-in – 2028.

3.4.2 To obtain this, the Trip End Model Presentation Program (TEMPro) version 8.1 has been used. The software uses National Trip End Model (NTEM) data to forecast the percentage increase in traffic flows between two years, in this case 2023 and 2027 and 2028. Analysis of NTEM data can be made by:

- Geographical area;
- Transport mode;
- Travel time of day;
- Purpose of journey;
- Years of interest; and
- Type of trip.

3.4.3 For the Proposed Development, the following details have been applied to obtain the growth factor:

- Dataset version – 80;
- Dataset scenario – Regional;
- Result type – Trip ends by time period;
- Base year – 2024;
- Future year – 2027 (Proposed Cambushinnie 400 kV Substation), 2028 (Proposed Cambushinnie OHL tie-in);
- Trip Purpose Group – All purposes;
- Time Period – Weekday AM peak period;
- Trip End Type – Origin / Destination;

- Area Description – Central and Tay; and
- Mode – Car Driver.

3.4.4 The resulting output from the TEMpro calculations was that a growth factors of 1.033 (2027) and 1.04 (2028) should be applied to 2024 data to achieve a baseline traffic flow level for each year.

3.5 Core Paths

3.5.1 Within the Study Area, there is one Core Path which intersects with Study Area roads. BRAC/14 runs along the A822 footway between Greenloaning and Braco. The path is 862 m long and has footways adjacent to the A822.

3.6 Accident History

3.6.1 The Crashmap database[9] has been reviewed to establish the historical accident record from the last five years on the road network adjacent to the site. The location and severity of the accidents recorded is shown in **Figure 3-1** below.

Figure 3-1 Accident History

3.6.2 On Study Area roads in the vicinity of the Site this data shows 0 fatal, 0 serious, and one slight injury accidents were reported. The accident occurred in 2021 at the A822 / Millhill Road junction and involved two vehicles, resulting in one casualty.

[9] Crashmap, n.d. *Crashmap* [online]. Available from: www.crashmap.co.uk [Accessed January 2025]

4. Sensitivity of Receptors

4.1 Introduction

4.1.1 This section sets out the approach for determining the sensitivity of receptors on each road link assessed within EA chapters for each element of the Proposed Development.

4.2 Determining Sensitivity of Receptors

4.2.1 Receptors are locations or land-uses categorised by sensitivity or environmental value. **Table 4-1** describes the receptor sensitivity adopted for the assessment of Proposed Development traffic.

Table 4-1 Sensitivity of Receptors

Receptor Sensitivity	Description
Very High	The receptor has little or no ability to absorb change without fundamentally altering its present character, is of very high environmental value, or of international importance.
High	The receptor has low ability to absorb change without fundamentally altering its present character, is of high environmental value, or of international importance.
Medium	The receptor has moderate capacity to absorb change without significantly altering its present character, has some environmental value or is of regional importance.
Low	The receptor is tolerant of change without detriment to its character, is low environmental value, or local importance.
Negligible	The receptor is resistant to change and is of little environmental value.

4.2.2 For the purposes of this assessment, the IEMA Guidelines 2023[10] identify receptors which are:

- People at home;
- People at work;
- Sensitive and / or vulnerable groups (including young age; older age; income; health status; social disadvantage; and access and geographic factors);
- Locations with concentrations of vulnerable users (e.g. hospitals, places of worship, schools);
- Retail areas;
- Recreational areas;
- Tourist attractions;
- Collision clusters and routes with road safety concerns; and
- Junctions and highway links at (or over capacity).

4.2.3 Each road link within the Study Area has been assessed against the criteria above, assigning a rating of Negligible, Low, Medium, High or Very High for each road link. The overall sensitivity of receptors of the road link has then been determined by taking the most sensitive rating (e.g. if “People at home” is considered of ‘Very High’ sensitivity, this rating will be applied).

4.3 Results

4.3.1 The full assessment result of the assessment is shown in **Table 4-2** overleaf.

[10] IEMA, 2023. *Environmental Assessment of Traffic and Movement* [online]. Available from: iema-report-environmental-assessment-of-traffic-and-movement-rev07-july-2023.pdf [Accessed February 2025]

Table 4-2 Sensitivity of Receptors

Link	Between		People at Home	People at Work	Sensitive and/or vulnerable Groups	Locations with concentrations of vulnerable users	Retail Areas	Recreational Areas	Tourist Attractions	Collision Clusters and routes with road safety concerns	Junctions and highway links at (or over) capacity	Overall Rating
A822 North Braco	A822 / Feddal Road Junction	Rural STOP Junction	Medium	Low	Medium	Medium	Low	Medium	Medium	Negligible	Negligible	**Medium**
A822 South Braco	A822 / Feddal Road Junction	Southern boundary Braco	High	Medium	Medium	High	Medium	Medium	Low	Negligible	Negligible	**High**

5. Proposed Development

5.1 Introduction

5.1.1 This section presents further detail of the Proposed Development including proposed access arrangements and car parking facilities.

5.2 Proposed Development

5.2.1 The Proposed Development is formed of two separate elements:

- Proposed Cambushinnie 400 kV substation; and
- Proposed Cambushinnie OHL tie-ins.

5.2.2 SSEN Transmission is proposing to upgrade the existing Beauly-Denny 275 kV circuit to 400 kV to mirror the ratings of the existing 400 kV circuit which runs along the route. A new substation site is therefore required at Braco West to be in proximity of the existing substation, and to tie back into it through an OHL link.

5.2.3 Project descriptions for the Proposed Developments are found in Chapter 2 of the following reports:

- Cambushinnie 400kV substation Environmental Appraisal (EA) and
- Chapter 2 of the Cambushinnie Overhead Line Tie-in EA.

5.3 Site Access Arrangements

5.3.1 Site access for Proposed Development construction traffic is via the proposed haul road and the existing access tracks for Braco West Substation. These tracks will be upgraded as part of the early works associated with the Proposed Development.

Construction traffic would leave the A9 (T) at its junction at Greenloaning, and route to the Proposed Development Site via the A822. A haul road will be constructed, allowing the village of Braco to be bypassed by construction traffic for the substation and overhead line elements of the development. The proposed haul road will join the existing access road for the Braco West Substation to route construction traffic the remainder of the route to site.

5.4 Car Parking

5.4.1 Car parking at each Site of the Proposed Development will be provided within the Site and no staff parking will take place on the public highway.

5.5 Operational Hours

5.5.1 Once operational, the Site will be in use 24 hours per day. However, it will be unlikely that there would be a requirement for increased staff to be required on site resulting from the Proposed Development. Occasional vehicular traffic will be generated to perform regular maintenance, however this is not anticipated to have a materially higher impact on the local road network than the existing Braco West Substation.

6. Forecast Travel Demand and Traffic Impacts

6.1 Introduction

6.1.1 This section provides an overview of the anticipated travel demands to and from the Proposed Development during construction. Given that operational traffic to and from the Site is anticipated to be negligible as a result of the Proposed Development, this section largely focuses on expected travel demand during the construction phase.

6.2 Construction Programme

6.2.1 The construction period is expected to last approximately 53 months. Included within this is the construction of:

- Proposed Cambushinnie 400 kV substation (peak construction traffic in Month 27); and
- Proposed Cambushinnie OHL tie-ins (peak construction traffic in month 35).

6.2.2 Details of the construction programme and the anticipated generation of construction vehicles throughout the construction period is included in **Appendix D Construction Traffic Programme.**

6.3 Construction Traffic

6.3.1 SSEN Transmission has provided a forecast of construction traffic for the Proposed Development. The vehicular generation to complete construction for each element of the Proposed Development is as follows:

Table 6-1 Proposed Development average daily two-way trip generation during peak month of construction

Construction Traffic	Proposed Cambushinnie 400 kV Substation		Proposed Cambushinnie OHL Tie-ins	
	Cars / LGV	HGV	Cars / LGV	HGV
Total daily two-way traffic	126	84	100	66

6.3.2 As shown in **Table 6-1** above, the Proposed Development is expected to generate a maximum 210 daily two-way vehicle trips during the peak construction month of the proposed Cambushinnie 400 kV substation. Of these trips, 126 are expected to be cars / LGVs with the remaining 84 trips coming from HGVs.

6.3.3 There may be a requirement for abnormal loads to be used for the delivery of plant and equipment to the site. This is likely to be in the region of two deliveries through the whole construction period. Measures on how these will be delivered, will be set out in the CTMP to be prepared by the construction contractor once appointed.

6.4 Traffic Impacts

6.4.1 The construction period for the entire development works is anticipated to last approximately 53 months. The most intense period of construction traffic generation for the Proposed Development is forecast for Month 27 during the construction of the Proposed Cambushinnie 400 kV Substation. **Table 6-1** contains the daily forecast traffic generation through these months.

6.4.2 As per the construction traffic routing described in **Section 5**, HGV construction traffic is forecast to appear on:

- A822 (At permanent haul road);
- A822 (North of A9);

- Millhill Road;
- A9 North; and
- A9 South.

6.4.3 Car / LGV traffic associated with staff movements could appear on any public road. However, due to the construction of the proposed haul road, it is assumed that the B8033 will not be used by Car / LGV traffic or HGV traffic, Traffic leaving the public road to route to site will bypass Braco and the B8033 by using the proposed haul road.

6.4.4 **Table 6-2** below represents an assessment on the traffic impacts on each Study Area road link during the forecast Month 27 construction period.

Table 6-2 Traffic Impact during the Construction Period of the Proposed Cambushinnie Substation and OHL

Location	2027 Baseline		Proposed Cambushinnie Substation and OHL		% Increase	
	Total Vehicles	HGVs	Total Vehicles	HGVs	Total Vehicles	HGVs
A822 (North of A822 / Feddal Road Junction)	4,074	101	126	0	3%	0%
A822 (South of A822 / Feddal Road Junction)	4,369	122	126	0	3%	0%
B8033 Feddal Road (Braco Village)	822	18	126	0	15%	0%
A822 (At Permanent Haul Road)	4,525	80	210	84	5%	106%
A822 (North of A9)	4,418	88	210	84	5%	96%
Millhill Road (Between A9 and A822)	552	12	126	84	38%	678%
B8033 (Easter Feddal - Braco)	415	15	0	0	0%	0%
B8033 (Craighead)	275	9	0	0	0	0%
A9 South (DfT Counter 724)	31,106	2,972	210	84	1%	3%
A9 North (DfT Counter 20730)	27,262	3,473	210	84	1%	2%

Source: SSEN Transmission

6.4.5 As shown in **Table 6-2** above, during Month 27, increases in total traffic of between 1% and 38% are forecast on the local road network. An increase of 1% on the trunk road network (A9) is not considered to be material. These percentage increases would be expected to last approximately three months before beginning to decrease.

HGV percentage increases of between 2% and 678% are forecast on the A9, Millhill Road and the A822. The larger increases observed can be attributed to low baseline HGV flows on these roads. It is therefore to be expected that large increases are possible without necessarily resulting in significant adverse impacts. IEMA Guidelines 2023[10] state that caution needs to be observed when applying thresholds for magnitude of change to roads with very low baseline flows as environmental impacts are unlikely to occur even with high percentage changes in traffic.

7. Fear and Intimidation

7.1 Introduction

1.1.1 This section sets out the process by which the Fear and Intimidation on and by Road Users assessment was undertaken with for the Non-Statutory EA chapters for each element of the Proposed Development. This assessment has been undertaken in line with guidance set out in IEMA Guidelines 2023[10].

7.2 Methodology

7.2.1 IEMA Guidelines 2023[10] states that fear and intimidation on a given road link is dependent on:

- The total volume of traffic;
- The heavy vehicle composition;
- The speed of vehicles; and
- The proximity of traffic to people.

7.2.2 A weighting system is set out in IEMA Guidelines 2023[10] to allow assessors to determine the likelihood of fear and intimidation given the characteristics set out above. This is achieved by determining a 'degree of hazard' which allows a score to be provided for each highway link within the Study Area and a resulting 'magnitude of impact' to be determined.

7.2.3 A degree of hazard score for each of total volume of traffic, heavy vehicle flow and average vehicle speed is determined using Table 3.1 in the IEMA Guidelines 2023[10], replicated below in **Table 7-1.**

Table 7-1 Fear and Intimidation Degree of Hazard Scoring

Average Traffic Flow over 18-hour day – all vehicles/hour 2-way (a)	Total 18-hour heavy vehicle flow (b)	Average vehicle speed (c)	Degree of hazard score
+1,800	+3,000	>40	30
1,200–1,800	2,000–3,000	30-40	20
600–1,200	1,000-2,000	20-30	10
<600	<1,000	<20	0

Source: Table 3.1 IEMA Guidelines 2023[10]

7.2.4 The total degree of hazard score from all three elements (total volume of traffic, heavy vehicle flow and average vehicle speed) is combined to provide a level of fear and intimidation. Table 3.2 in IEMA Guidelines 2023[10] provides the thresholds that should be used to determine this (see **Table 7-2**).

Table 7-2 Levels of Fear and Intimidation

Level of Fear and Intimidation	Total Degree of Hazard Score (a)+(b)+(c)
Extreme	71+
Great	41-70
Moderate	21-40
Small	0-20

Source: Table 3.2 IEMA Guidelines 2023[10]

7.2.5 The magnitude of change for fear and intimidation for a proposed development is then approximated with reference to the changes in the level of fear and intimidation from baseline conditions. **Table 7-3** from the IEMA Guidelines 2023[10] is used to determine the magnitude of change from a given change in level of fear and intimidation. This table is replicated below in **Table 7-3**.

Table 7-3 Fear and Intimidation - Magnitude of Change

Magnitude of Change	Change in Fear and Intimidation Level from Baseline Conditions
High	Two step changes in Fear and Intimidation Level
Medium	One step change in Fear and Intimidation Level, but with: • >400 veh increase in average 18hr AV two-way all vehicle flow; and/or • >500 HV increase in total 18hr HV flow
Low	One step change in Fear and Intimidation Level, but with: • <400 veh increase in average 18hr AV two-way all vehicle flow; and/or • <500 HV increase in total 18hr HV flow
Negligible	No step change in Fear and Intimidation Level

Source: Table 3.3 IEMA Guidelines 2023[10]

7.3 Results

7.3.1 The results of the fear and intimidation assessment for the Proposed Development and Cumulative development are included in **Appendix E - IEMA Environmental Assessment Results** and are summarised in **Table 7-4** below.

Table 7-4 Fear and Intimidation Magnitude of Change Assessment Summary

Road Link	Magnitude of Change	
	Proposed Development	Cumulative Development
A822 (North of A822 / Feddal Road Junction)	Negligible	Negligible
A822 (South of A822 / Feddal Road Junction)	Negligible	Negligible
B8033 Feddal Road (Braco Village)	Negligible	Negligible
A822 (At Permanent Haul Road)	Negligible	Negligible
A822 (North of A9)	Negligible	Negligible
Millhill Road (Between A9 and A822)	Negligible	Negligible
B8033 (Easter Feddal - Braco)	Negligible	Negligible
B8033 (Craighead)	Negligible	Negligible
A9 South (DfT Counter 724)	Negligible	Negligible
A9 North (DfT Counter 20730)	Negligible	Negligible

8. Framework Construction Traffic Management Plan

8.1 Purpose

8.1.1 The purpose of this Framework CTMP is to provide a framework from which a finalised CTMP can be developed post-consent. This Framework outlines the measures which could be used during the construction of the Proposed Development to mitigate transport-related impacts. Access to the Proposed Development by HGVs and construction plant vehicles would be planned, managed and executed by the applicant's appointed contractor to ensure the safety and reliability of deliveries to Site, reduce congestion on the local road network and minimise the environmental impact.

8.2 CTMP Development

8.2.1 The opportunity to develop, amend and enhance the finalised CTMP in response to comments received on this Framework document and through the planning and consultation process should be recognised.

8.2.2 The CTMP would consider feedback from local residents and community groups and be developed in consultation with PKC in order to establish the appropriate methods in which the impact of traffic related to the Proposed Scheme's construction can be minimised.

8.2.3 This document would be updated as necessary with input from PKC following feedback from its consultation and planning process.

8.3 Hours of Work

8.3.1 Working hours for construction activities related to the Proposed Development would be agreed with PKC Council, but are anticipated to be:

- 07:00 to 19:00 Monday to Friday;
- Saturday 08:00 to 13:00;
- No construction should be carried out on Sundays or bank holidays unless in exceptional circumstances; and
- Any work which is required or intended to take place outside of these hours, except for emergency situations, would be subject to prior agreement and/ or reasonable notice to PKC.

8.4 Site Access

8.4.1 The Site would be secured by hoarded gates and during working hours would remain under control of an appointed person who would physically control entry to Site. Traffic entering or exiting the Site would give way to road traffic on the public road network (when required). Vehicles would leave and access the Site via the proposed haul road and no vehicles would be required to stop on the public highway itself when accessing the Site.

8.4.2 Warning signs would be established and maintained throughout the duration of construction works and would be situated at agreed locations to warn road users of the access.

8.5 Construction Traffic Routing

8.5.1 It will be a key responsibility of the Applicant or Principal Contractor to ensure that each sub-contractor is aware of the route restrictions prior to any works taking place and to enforce the restrictions stated in the Proposed Schemes CTMP.

8.5.2 The Site gates would be manned and controlled during normal Site working hours and any vehicle arriving on Site will be guided to the required location for loading or unloading.

8.5.3 The appointed contractor would also be responsible for mitigating, where possible, the cumulative impacts of other construction projects in the area through careful consideration of routing and access timings.

8.5.4 Likely routes that construction traffic will follow will be:

- A9;
- A822; and
- Permanent haul road.

8.5.5 It is considered that each of these routes can accommodate the additional construction traffic required for the Proposed Development. Staff will make their own way via a variety of routes depending on their home location but the impact of staff journeys on the local road network is expected to be negligible.

8.6 Deliveries

8.6.1 Due to the scale of the Proposed Development, the number of daily deliveries to Site throughout the construction phases is anticipated to be low and the disruption imposed on other road users would be minimised due to the scheduling of deliveries and material removal.

8.6.2 Construction materials that are delivered will be stored on-site.

8.7 Enforcement

8.7.1 All contractors would be required to adhere to the CTMP. Compliance will be monitored by the applicant's Site representative via spot checks to ensure that vehicles follow the measures set out in the CTMP.

8.8 Speed Limit

8.8.1 The Applicant would ensure that all site traffic abides by local speed limits to maintain the safety of other road users and pedestrians. A site speed limit of 10 mph would be established and enforced throughout the duration of construction works to provide a safe environment for Site workers and any pedestrians which pass the Proposed Development.

8.8.2 Signage would be in place prior to any works taking place which will advise of any permanent speed limits which are in force and all site workers or haulage sub-contractors would be made aware of the speed requirements as part of their site induction.

8.9 Summary

8.9.1 This section discusses the potential traffic management arrangements during construction at the Site and provides an assessment of the impacts on the Site during this period.

8.9.2 The hours of work at the Site are expected to be 07:00 – 19:00 from Monday to Friday and 08:00 – 13:00 on Saturdays with no work taking place on Sundays and bank holidays.

8.9.3 The Site would be secured by hoarded gates and during working hours would remain under control of an appointed person who would physically control entry to the Site. Traffic entering or exiting the Site would give way to road traffic on the public road network (when required). No construction vehicles would require to stop on the public highway.

8.9.4 It is anticipated that the likely routes of construction traffic would be via the A9, A822 and proposed haul road. It shall be the responsibility of the appointed contractor to assess these routes for restrictions and mitigate any cumulative impacts of construction traffic.

8.9.5 The number of deliveries to the Site is anticipated to be low with all construction materials to be stored and secured on Site.

8.9.6 All traffic will abide by local speed limits with a 10 mph speed limit enforced within the Site.

9. Cumulative Development

9.1 Introduction

9.1.1 This section sets out the process by which cumulative development traffic was incorporated into the Traffic and Transport assessment in the non-statutory EA chapters.

9.2 Cumulative Effects

9.2.1 The effects of the Proposed Development have been assessed in combination with other projects that have been identified through the cumulative screening process. Two sites have been identified which are both located adjacent to the substation.

9.2.2 **Table 9-1** lists the details of the developments included in the cumulative assessment.

Table 9-1 Cumulative Developments

Reference	Description	Location
21/00756/FLM	Battery Energy Storage Site	Adjacent to substation, to the northeast.
22/02231/FLM	Battery Energy Storage Site	Adjacent to substation, to the northeast.

9.2.3 Construction traffic information has been obtained from the Braco West Energy Storage Project Supporting Statement[11]. Table 2 of that document shows a peak of eight total daily movements associated with construction, comprising of four HGV movements and four site personnel movements. As there are two sites, but this information is only available for one of the sites, it has been assumed that this will be the case for both sites. Therefore, the total construction traffic used in the cumulative assessment is 16 movements, eight HGV and eight site personnel.

9.3 Assumptions

9.3.1 A key assumption for the cumulative development assessment is that the peak period for forecast construction traffic generation for cumulative developments will coincide with the peak period for construction traffic generation each element of the Proposed Development. In practice, this is highly unlikely to occur, and it would be anticipated that discussions would be undertaken to minimise the cumulative impact of all cumulative development in the area. However, to present a worst-case scenario of potential effects on the Study Area roads, this assumption has been made.

9.3.2 It has also been assumed that construction traffic for cumulative development will appear on the same Study Area roads as the Proposed Development construction traffic.

9.4 Results

9.4.1 **Table 9-2** below shows the anticipated impact that cumulative development would have on Study Area roads. The impacts below are during the proposed Cambushinnie 400 kV substation construction as this presents the worst case scenario as it has the highest construction traffic forecast among Proposed Development elements.

[11] Whirlwind Energy Storage Ltd, 2023. *Braco West Energy Storage Project* [online]. Available from: 22_02231_FLM-AMENDED_SUPPORTING_STATEMENT_DESIGN_AND_ACCESS_STATEMENT-2061861.pdf [Accessed February 2025]

Table 9-2 Traffic Impact during the Construction Period of the Cumulative Development (Substation)

Location	2027 Baseline		Cumulative Development		% Increase	
	Total	HGV	Total	HGV	Total	HGV
A822 (North of A822 / Feddal Road Junction)	4,043	100	134	0	3%	0%
A822 (South of A822 / Feddal Road Junction)	4,335	121	134	0	3%	0%
B8033 Feddal Road (Braco Village)	816	17	134	0	16%	0%
A822 (At Permanent Haul Road)	4,490	171	226	92	5%	116%
A822 (North of A9)	4,384	179	226	92	5%	105%
Millhill Road (Between A9 and A822)	547	104	226	92	41%	742%
B8033 (Easter Feddal - Braco)	412	107	0	0	0%	0%
B8033 (Craighead)	273	9	0	0	0%	0%
A9 South (DfT Counter 724)	30,865	3,041	226	92	1%	3%
A9 North (DfT Counter 20730)	27,051	3,538	226	92	1%	3%

9.4.2 **Table 9-2** shows that increases of between 1% and 41% are forecast to occur during the most intense periods of construction as a result of cumulative development. In terms of HGVs, increases of between three and 742% are forecast. It is forecast that these effects would last approximately three months before beginning to decrease.

9.4.3 The increases in HGVs on public roads should be caveated as per the assessment in Section 6 regarding low baseline flows. The IEMA Guidelines 2023[10] state that caution should be observed when applying percentage increases to very low baseline flows as significant impacts would be unlikely to occur despite a high percentage change.

10. Summary

10.1.1 AECOM has been commissioned by SSEN Transmission, to assist with the development of the Cambushinnie 400 kV substation and associated developments.

10.1.2 This technical appendix accompanies two non-statutory EA chapters on each of the elements of the Proposed Development.

10.1.3 The Proposed Development will comprise of the following:

- Proposed Cambushinnie 400 kV Substation; and
- Proposed Cambushinnie OHL tie-ins.

10.1.4 Access to the Proposed Development will be via the existing Braco West Substation access road. The construction traffic route is proposed to be A9, A822 and permanent haul road.

10.1.5 Relevant National, Regional and Local transport and planning policy documents have been reviewed within this document, highlighting where the Proposed Development adheres to current policy.

10.1.6 Baseline conditions on the local transport network have been assessed in terms of the existing infrastructure and the sensitivity of receptors. The baseline has been informed by traffic surveys from which baseline traffic flows were derived.

10.1.7 It has been forecast that public roads will experience increases in traffic of between 1% and 38% as a result of Proposed Substation construction traffic. These percentage increases would be expected to last approximately three months before beginning to decrease.

10.1.8 Details of the Fear and Intimidation assessment are included suggesting that public roads within the Study Area would experience negligible effects.

10.1.9 A Framework CTMP is included which covers measures which could potentially be used to manage and mitigate the impacts of construction traffic on public roads. A final CTMP would be the responsibility of the Principal Contractor once appointed. They will also be responsible for ensuring its adherence.

10.1.10 A cumulative assessment was undertaken, considering two BESS developments in close proximity of the Proposed Cambushinnie 400 kV Substation. The forecasted increase in traffic on public roads during the most intense period of cumulative development construction traffic is between 1% and 41%. These increases are forecast to last approximately three months before beginning to decrease.

Technical Memorandum

Subject: Cambushinnie 400 kV Substation Traffic Data Collection

Introduction

Scottish Hydro Electric Transmission plc (SHE Transmission) operating as Scottish & Southern Electricity Networks (SSEN Transmission) is proposing to upgrade the existing Beauly-Denny 275 kV circuit to 400 kV to mirror the ratings of the existing 400 kV circuit which runs along the route. As the existing Braco West Substation is not large enough to accommodate the additional equipment required for the upgrade programme a new substation is proposed to be delivered via a Section 37 Application.

The Proposed Development will include the following.

- Substation platform of approximately 380m x 315m with associated earthworks;
- Installation of 400 kV transformers, a new 400 kV double busbar and ancillary equipment;
- A new control building (approximately 24m x 49m) with an approximate height of 7m;
- Removal of some of the equipment from the existing 275 kV Braco West substation, with the control building likely to remain;
- OHL tie ins from the new substation to the existing Beauly-Denny OHL;
- Upgrade / new access tracks and temporary construction and laydown compound areas;

A transport assessment will be undertaken to support the approvals process for the Proposed Development. This Technical Memorandum covers traffic data collection requirements for the transport assessment.

Proposed Development Site

Figure 1 shows the location of the proposed development site and the roads likely to be used by construction traffic. The proposed routing for HGV construction traffic is from the A9 via the A822 and B8033 to the current substation access road at Feddal. A proposed access track for construction traffic linking the A822 and B8033 south of the village of Braco is a consideration at this time. Some car and LGV traffic may route on the A822 north of Braco and the B8033 south of the Feddal junction.

Structures and materials would be delivered to site via an agreed HGV construction traffic route, which may include the proposed access track. All materials would be delivered to the construction compound. Concrete would be delivered to site pre-mixed. Hardcore and earthworks materials for the construction of the Proposed Development would be a combination between site won and locally imported materials. Site won materials would be prioritised over imported materials to reduce the impact on the local roads and the environment.

Department for Transport (DfT) Traffic Data

The nearest Department for Transport (DfT) count sites on the A9 are at Balhaldie (Site Number 724) and Blackford (Site Number 20730). The Balhaldie and Blackford count sites both have automatic counter data from 2022 available for the A9.

The DfT count site on the A822 in Braco (Site Number 10927) has data from a manual count in 2020 that is used to create estimated traffic data for 2022. The DfT count site on the B8033 near Braco (Site Number 811369) has data from a 2022 manual count. The 2022 data from the DfT count sites will be used in the Cambushinnie 400 kV Substation transport assessment. The DfT 2020 based traffic data on the A822 in Braco will not be used as it's potentially outside the normally accepted 3-year shelf-life of traffic data.

Proposed 2024 Traffic Data Collection

2024 traffic data collection is required to compliment and reinforce the available DfT data. 2024 traffic surveys will be focussed on the proposed construction traffic routes to and from the A9, the A822 and the B8033 at Braco. **Figure 2** shows the general location of the proposed 2024 traffic surveys. **Appendix A** contains a traffic survey specification that will be issued to traffic survey companies and includes a location plan for the junction turning counts (JTC) and automatic traffic counter sites (ATC) listed below.

Junction Turning Counts are proposed at the following junctions.

- JTC1 – A822 / Feddal Road Junction
- JTC2 – A9 / Millhill Road Junction
- JTC3 – Millhill Road Junction (Immediately north of A9 / Millhill Road Junction)
- JTC4 – B8033 / Easter Feddal Junction

Automatic Traffic Counters are proposed at the following locations.

- ATC1 – On A822, north of A822 / Feddal Road Junction
- ATC2 – On A822, south of A822 / Feddal Road Junction
- ATC3 - On Feddal Road, west of A822 / Feddal Road Junction
- ATC4 – On A822, north of A822 / Braco Cemetery Junction
- ATC5 – On A822, on two-way section of road, north of A9 slip roads
- ATC6 – On Millhill Road, west of A9 / Millhill Road Junction
- ATC7 – On B8033, south west of Braco, north of farmhouse access
- ATC8 – on B8033, approximately 300m west of Muckle Burn

Automatic Traffic Counters will be in place for 7-days, and the manual classified turning counts will be carried out during this time. The 2024 traffic data collection exercise is to be scheduled for week commencing 4th March 2024.

The 2024 traffic data will be used in combination with the 2022 DfT traffic data within the Transport Assessment, and Environmental Impact Assessment Transport Chapter if required, to support the S37 Application for the proposed development.

Client:	

Survey Type – Automatic Traffic Counts and Manual Classified Junction Turning Counts

Aspect	**Specification**
Survey Duration	ATC – 7 days, JTC – 8 hours on neutral weekday (Tuesday, Wednesday, Thursday)
Survey Times	ATC – 24 hour, JTC – 07:00 – 10:00 and 14:00 – 19:00
Survey Dates	Surveys to begin week commencing 4/3/24
Location(s) of Survey	<u>Automatic Traffic Counts</u> ATC1 – On A822, north of A822 / Feddal Road Junction ATC2 – On A822, south of A822 / Feddal Road Junction ATC3 - On Feddal Road, west of A822 / Feddal Road Junction ATC4 – On A822, north of A822 / Braco Cemetery Junction ATC5 – On A822, on two way section of road, north of A9 slip roads ATC6 – On Millhill Road, west of A9 / Millhill Road Junction ATC7 – On B8033, south west of Braco, north of farmhouse access ATC8 – on B8033, approximately 300m west of Muckle Burn <u>Manual Classified Junction Turning Counts</u> JTC1 – A822 / Feddal Road Junction JTC2 – A9 / Millhill Road Junction JTC3 – Millhill Road Junction (Immediately north of A9 / Millhill Road Junction) JTC4 – B8033 / Easter Feddal Junction
Map of Survey Locations	See attached "Cambushinnie 400 kV Substation Traffic Survey Location Plan"
Overview of Survey Methods	<u>Automatic Traffic Counts and Vehicle Speed Surveys</u> Automatic Traffic Counts with Speed Surveys are required at the locations specified above or at an appropriate location nearby. These should take place over 7 days and operate 24 hours per day. The surveys should take place week commencing 4th March 2024. <u>Manual Classified Junction Turning Counts</u> Junction turning counts required at the junctions specified above. We require these to be carried out during the time periods specifed above on a neutral weekday.

Reporting	Data Reporting Periods	
	Classification	Vehicles will be classed into standard classifications (Pc / Mc / Car / LGV / OGV1 / OGV2 / Bus and Coach). Vehicle flow should be split into both directions.
	Position of Survey	Survey company to station equipment and surveyors as appropriate to gather required datasets.
Additional Information	Necessary permissions to undertake work to be confirmed in advance of survey date. Please note street furtniture not to be used without prior approval by Perth and Kinross Council depending on location.	

Outputs	
Digital Video Output Required	Sub-consultant to provide copies of all camera footage.
Data to be provided in a spreadsheet format	Yes

Data to be provided within the following timescale	2 weeks from survey date
Survey Company Responsibilities	
The survey company must have its own insurance	
The survey company is responsible for **all aspects** of Health and Safety	
The survey company must inform the relevant Road Authorities, Rail Authorities, Perth and Kinross Council, Transport Scotland and the Police of surveys that it is undertaking on behalf of AECOM	
The survey company must ensure operatives are trained and in place where appropriate with appropriate PPE prior to the start of surveys	
The survey company must have its own checking procedure for data output	
Call off costs due to unforeseen circumstances including adverse weather must be stated when providing a quote, with the time periods to which this applies

Report Suspicious

Dear David,

The points of survey are acceptable from a local road network perspective.

Please note: Consent to place counting equipment on the local road network will need to be obtained from our Roads Network Management Team at the following email address: RoadsNetworkManagement@pkc.gov.uk

Thanks and best regards,
Lachlan

Smarter Travel Choices - **Perth & Kinross | Dundee | Angus**

Transport Scotland

Transport Scotland state it understands the proposed development to be a new 400kV substation to be constructed to allow the existing network to connect to the 400kV Beauly-Denny OHL with the nearest trunk road being the A9(T) which is located approximately 8.5km to the southeast at Greenloaning. TS also confirm it notes that the proposals are at the site selection stage, with various Options being considered with Option 2 being SSEN Transmission's preferred option.

Transport Scotland (TS) state it has no comment to make on the individual site options, however it should be noted that in the event that the construction works associated with the substation results in the need for Abnormal Load Deliveries (ALD), TS will require to be satisfied that the size of loads proposed can negotiate the selected route and that their transportation will not have any detrimental effect on structures within the trunk road route path.

TS state a full Abnormal Loads Assessment report should be provided that identifies key pinch points on the trunk road network. Swept path analysis should be undertaken and details provided with regard to any required changes to street furniture or structures along the route.

In addition, TS state a threshold assessment in accordance with the IEMA Guidelines for the Environmental Assessment of Road Traffic will be required, to determine whether there are likely to be any significant environmental issues associated with increased traffic on the trunk road network, and any requirement for further trunk road assessment. This can be undertaken as part of the planning application process and TS can provide further guidance at the formal scoping stage.
