

Corriemoillie Substation Extension

Pre-application consultation event

SSEN Transmission invites you to share your views

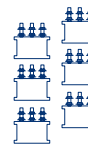

Scottish and Southern Electricity Networks (SSEN) Transmission is holding a drop-in Pre-Application Consultation (PAC 1) exhibition on our proposals to extend the existing 132kV substation at Corriemoillie. To support the connection of renewable developments in the area, we are required to extend the existing platform at Corriemoillie 132kV substation. This will allow for the installation of an additional bay to accommodate new electrical equipment.

This first stage of consultation will provide information on:

- The design and planning process
- Environmental and engineering considerations
- Maps and visual material showing the work undertaken to date

Our aim is to give stakeholders and community members a clear understanding of the project's development so far.

Engagement with the local community is vital in helping us shape our proposals. We are keen to capture your feedback and local knowledge to help identify opportunities and potential challenges early in the process.

More information overleaf.

The consultation event
will be taking place on:

Wednesday 12 November, 3–7pm
Garve Village Hall,
Garve, IV23 2PR

We encourage all members
of the local community and all
interested parties to attend the event.
