East Coast 132kV Transmission Network Upgrade Virtual Consultation

SSEN Transmission invites you to come and share your views with us

Scottish and Southern Electricity Networks Transmission (SSEN Transmission) are taking forward plans to upgrade the East Coast 132kV Transmission Network which currently runs between the Craigeibuckler/Tarland overhead line (OHL) Tee point (west of Aberdeen) and the Tealing substation (North of Dundee). This event will provide further details on the need for the upgrade and present the preferred route corridor for a replacement 132kV OHL, between the existing Brechin and Tealing substations, proposed as part of this upgrade.

The virtual consultation events have been designed to be as interactive as face to face events, allowing for presentation of key project information and plans, as well as providing an opportunity to ask questions about the project. Visitors will be able to engage directly with the project team, via a live text chat function, where they can ask any questions they might have about the project and share their feedback on the current proposals.

The team will be available for
live chat sessions on:

25 February 2021

1.00pm –3.00pm

5.00pm –7.00pm

If you have any questions, please
do not hesitate to contact
