East Coast 400kV OHL Upgrade Public Meeting

SSEN Transmission are currently upgrading the existing 275kV overhead line that runs between Kintore and Kincardine to 400kV operation.

Our Principal Contractor Balfour Beatty have established their site compound off the B966 in the Edzell area and have been working on the towers in the Fetteresso area since February working north towards Kintore.

We are inviting members of the public and all interested parties from in and around Edzell and the surrounding area to attend a public meeting with SSEN Transmission and Balfour Beatty to find out more about the works involved and discuss traffic management and road closures in the area.

The public meeting details are as follows:

Edzell Inglis Memorial Hall

26 July 2023

6pm
