# **Errochty GSP Newsletter**

### **March 2024**

۲

## Construction works have commenced at SSEN Transmission's Errochty substation in Tummel Bridge.

The works will see the existing site be extended to facilitate the installation of two new 90MVA 132/33kV transformers along with appropriate 132kV and 33kV switchgear to create a new Grid Supply Point (GSP).

This new Errochty GSP will provide a 33kV connection point, to accommodate all generation and demand currently served by Tummel Bridge GSP, including the requested capacity increase for Tummel Bridge Hydro Power station.

# Works carried out to date

- Pre enabling works to establish a welfare area which consisted in tree felling, cutting and filling of a 25x60m area to create a level platform and build up with stone to create a hard standing.
- Installation of a temporary substation fence to enable the dismantling of the existing external fence to create more working space for earthworks.

The project has a dedicated website, please scan the QR code to be taken to the project website or use the following URL: bit.ly/42AWjWp

- Installation of welfare cabins and services March 24
- Modifications within the substation building April 24
- Creation of the GT3 transformer bund April/May 24
