

Fasnakyle to Bingally 132kV Connection

Final consultation event

The event will be taking place on:
Tuesday 6 October 3.30–7pm
Cannich Hall, Cannich, IV4 7LJ

SSEN Transmission is planning to undertake a pre-application consultation for development requiring consent under Section 37 of the Electricity Act 1989.

The consultation is for proposals to install and keep installed a new 132kV electricity connection between Fasnakyle Substation and Bingally Substation, comprising mainly of underground cable with some re-configuration of the overhead line section.

The consultation will present a summary of the feedback received following earlier consultation stages. It will present the proposed alignment that we intend to submit for Section 37 consent and information that has informed our proposals.

Please note that any comments made to SSEN Transmission as the Applicant are not representations to Scottish Ministers as the decision maker. There will be opportunity to make representations to Scottish Ministers via the Energy Consents Unit following the submission of the application.

All comments must be received no later than **3 November 2026**.
