

Fetteresso substation upgrade

Pre-application consultation event

We are holding a statutory pre-application consultation event for our proposed upgrades to Fetteresso substation.

The pre-application process is a key first step in the Town and Country Planning process for national planning applications.

We are proposing to upgrade the existing 132kV Fetteresso substation, located within Fetteresso Forest, to increase network security and resilience, address asset integrity requirements as well as accommodate future incoming connections.

There will be no requirement to extend the working platform.

All new equipment will be located on the existing substation platform.

The project team will be available to discuss our proposals, answer questions and seek feedback on our plans.

The Consultation Event will be taking place on:

Thursday 28 August, 3-7pm

**Stonehaven Town Hall,
Allardice St, Stonehaven, AB39 2BU**

We encourage all members of the local community and all interested parties to attend the event.

If you have any questions, please do not hesitate to contact our Community Liaison Manager:
