

Fetteresso substation upgrade

Pre-application feedback event

We are pleased to be hosting a second public Pre-Application Consultation (PAC) event for our proposed upgrades to Fetteresso 132kV substation.

Following our initial event in August 2025 and feedback period which closed on 25 September 2025, we are holding this event to present our proposed design for planning submission, following feedback received from the first PAC event and ongoing design developments.

We will also present our responses to feedback received as part of the statutory consultation, which is required for major and national planning applications.

We are proposing to upgrade the existing 132kV Fetteresso substation, located within Fetteresso Forest, to increase network security and resilience, address asset integrity requirements as well as accommodate future incoming connections. There will be no requirement to extend the working platform. All new equipment will be located on the existing substation platform.

The project team will be available to discuss our proposals, answer questions and seek feedback on our plans.

More information overleaf.

The Consultation Event will be taking place on:

**Thursday 23 October, 3–7pm,
Stonehaven Town Hall,
Allardice St, Stonehaven, AB39 2BU**

We encourage all members of the local community and all interested parties to attend the event.

If you are unable to attend this PAC event or wish to view the information session materials these will be on display and available to download from the project documents section of the projects webpages.
