

# Kintore to Tealing 400kV Projects

## Pre-application consultation events

**We are holding statutory pre-application consultation events for our proposed substations; Hurlie in Fetteresso Forest and Tealing (Emmock). The pre-application process is a key first step in the Town and Country planning process for national planning applications.**

To support the growth in renewable developments across the north of Scotland, which are supporting the country's drive towards net zero, investment in our network infrastructure is needed to connect this power and transport it to areas of demand.

As part of this investment, new 400kV substations are required at Fetteresso Forest and at Tealing, near to both the existing Fetteresso and Tealing substations. These substations will connect into the new proposed Kintore to Tealing 400kV overhead line.

During our drop-in events you will be able to view further information about our proposed substation sites, meet the team, ask questions and share feedback ahead of our second public events.

We will also be consulting on new routes proposed following the publication of our Report on Consultation in December 2023 as well as the sections of existing overhead line that require to be upgraded between Alyth to Tealing and Tealing to Westfield.
