

# Cable route

# Project timeline

The timeline below identifies key milestones for consenting and construction of the project.

# Other projects in the area

## **Kinardochoy substation upgrade**

This project includes an extension to the gas-insulated switchgear (GIS) board to install two new supergrid transformers, to facilitate the cable connection between Kinardochoy – Errochty. Construction is due to start in January 2026 with completion of the cable civil works across the route end September 2027. Final energisation will be in 2029/30.

## **Errochty Grid Supply Point (GSP) upgrade**

This project includes the installation of two 90MVA 132/33kV transformers and other associated equipment at the new site adjacent to the existing Errochty 132kV substation. Construction started in November 2023 and is anticipated to be completed in August 2026.

# Have your say

**We value community and stakeholder feedback. Without this, we would be unable to progress projects and reach a balanced proposal.**

## The feedback period

We intend to submit our planning application in **summer 2025**. We welcome final comments from members of the public, statutory consultees and other key stakeholders regarding our proposals until we submit our planning application.

## How to provide feedback:

Submit your comments and feedback by emailing or writing to your Community Liaison Manager by **26 May 2025**.

## What we're seeking views on

During our last public consultation event in November 2024, we wanted to know your thoughts on our project plans, where you thought we could make improvements, and any changes and refinements we'd made. We are now asking for any final comments or feedback ahead of submitting planning application.

We want to harness your local knowledge so that we spot any unforeseen challenges early and maximise the potential benefits and opportunities for your communities.

By telling us what you think, you will help shape our proposals.

To support everyone online, we provide accessibility and language options on our website through 'Recite Me'. The accessibility and language support options provided by 'Recite Me' include text-to-speech functionality, fully customisable styling features, reading aids, and a translation tool with over 100 languages, including 35 text-to-speech.

Please select "Accessibility" on our website to try out our inclusive toolbar."

## Our Community Liaison team

Each project has a dedicated Community Liaison Manager who works closely with community members to make sure they are well informed of our proposals and that their views, concerns, questions or suggestions are put to our project teams.

Throughout the life of our projects, you will hear from us regularly. We aim to establish strong working relationships by being accessible to key local stakeholders such as community councils, residents' associations and development trusts, and regularly engage with interested individuals.

## Community Liaison Manager

The best way to contact us regarding this project is through our Community Liaison Team.
