

Kinardochy Substation Virtual Consultation

SSEN Transmission invites you to come and share your views with us

Ahead of Scottish and Southern Electricity Networks (SSEN) submitting their planning application to Perth and Kinross Council for a new reactive power electricity substation approximately 3 kilometres South from Tummel Bridge we are holding two virtual consultation exhibitions to gain views and feedback on our proposals following the pre application consultation event that we held in November.

The virtual consultation events have been designed to be as interactive as face to face events, allowing for presentation of key project information and plans, as well as providing an opportunity to ask questions about the project. Visitors will be able to engage directly with the project team, via a live chat function, where they can ask any questions they might have about the project and share their feedback on the current proposals.

To find out how you can join the interactive virtual consultation visit the project website:

<https://www.ssen-transmission.co.uk/projects/kinardochy-substation/>

The virtual consultation
events will be taking place on:

**20 August 2020
1-3pm**

**20 August 2020
5-7pm**
