Kintore 132kV Asset Replacement project Consultation Events

SSEN Transmission invites you to come and share your views with us

Kintore substation is a critical site on the Electricity Transmission Network. It acts as the connection hub for many other 275kV and 132kV sites in the North East and facilitates power transfer down the East Coast of Scotland.

The 132kV equipment at Kintore Substation is nearing the end of its operational life. Asset data and analysis has shown that the asset should be replaced, and this has been agreed by the energy regulator Ofgem.

SSEN Transmission would like to extend an invitation to local members of the community and interested parties to attend an exhibition to discuss our plans with the project team and let us know your thoughts on our proposals.

A face to face public exhibition will take place on **Tuesday the 19th of October at Kintore Public Hall between 2pm-7pm**. This is an open door drop in session open to all members of the public and interested parties.

A further two online consultation events will take place on **Wednesday the 20th of October between 1pm-3pm & 5-7pm**.

The online virtual consultation events have been designed to be fully interactive, allowing for presentation of key project information and plans, as well as providing and opportunity to ask questions about the project. Visitors will be able to engage directly with the project team via a live chat function, where they can ask any questions they might have about the project and share their feedback on the current proposals.

To find out how you can join the interactive virtual consultation visit the project website www.ssen-transmission.co.uk/projects/kintore-400kv-substation, or scan the QR code.

If you have any questions, please do not hesitate to contact our Community Liaison Manager:

Dav Lynch

Community Liaison Manager
200 Dunkeld Road
Perth, PH1 3AQ
