

Loch Buidhe area 400kV substation

Pre-Application Consultation Event

We are holding statutory Pre-Application Consultation for our proposed Loch Buidhe 400kV substation project. The pre-application process is a key first step in the Town and Country Planning process for National planning applications.

To support the growth in renewable developments across the north of Scotland, which is supporting the country's drive towards Net Zero, investment in our network infrastructure is needed to connect this power and transport it to areas of demand.

The Loch Buidhe 400kV substation is a strategic development proposed adjacent to the existing 275kV substation.

During our consultation event you will be able to view information about our proposed plans for the substation, meet the project team, ask questions and share feedback ahead of our second public event in early June.

More information overleaf.

You are invited to attend our drop-in consultation event:

Monday 18 March, 3.30 – 8.30pm

Bonar Bridge Community Hall,
Bonar Bridge, IV24 3EA

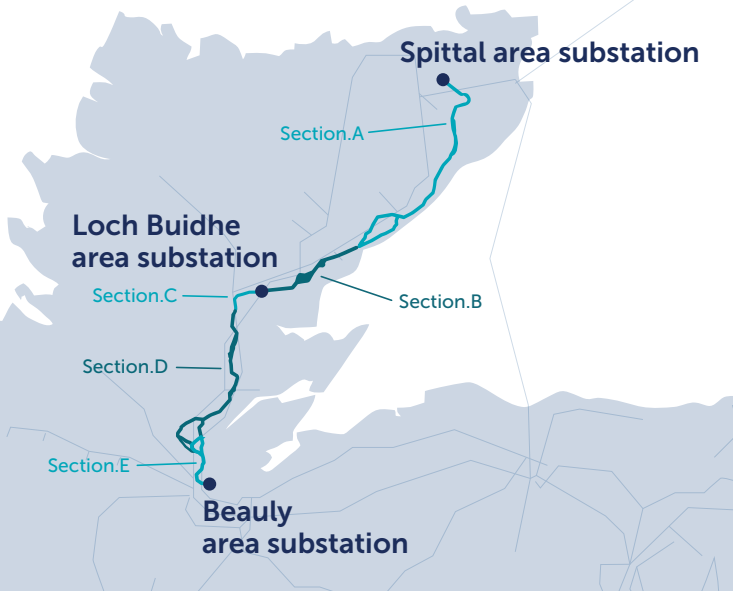

Find out more and register for project updates, visit the project website by scanning the QR code, or use the following URL:

The 400kV substation at Loch Buidhe will connect to our proposed new 400kV overhead line between Spittal and Beaully. During this event we will also share refined routes for the overhead line and will seek your views on these to help identify suitable alignments. To find out more and view the other locations we'll be holding events on the overhead line visit: ssen-transmission.co.uk/slbb

If you have any questions, please do not hesitate to contact our Community Liaison Manager:
