

Scottish & Southern
Electricity Networks

North East Overhead Line Upgrades

Come and talk to us

Scottish and Southern Electricity Networks (SSEN) are taking forward plans to reinforce the existing 275kV overhead line to enable operation at an increased voltage of 400kV. As such we are hosting a number of public exhibitions to provide greater detail about this project.

We hope that by attending one of these events, we will be able to provide greater insight into the requirement for these works in the North East of Scotland on the existing energy transmission network.

SSEN would like to extend an invitation to local members of the community and interested parties to attend one of our exhibitions on the following dates to discuss our plans with the project team and to provide feedback on our proposals:

Rothienorman

Monday 19th November

Rothienorman
Community Bowling
Club, Greenview Centre

15:00 – 19:00

Keith

Tuesday 20th November

Keith Community and
Sports Centre, Banff
Road
