

Scottish & Southern
Electricity Networks

Rothienorman Substation Pre-Application Consultation

Come and talk to us

Scottish and Southern Electricity Networks (SSEN) is intending to submit a planning application to Aberdeenshire Council for a new 400/275kV electricity substation approximately 2 miles west of the village of Rothienorman, due west of Wood of Middleton. The substation was first granted planning permission in February 2012, however due to changing network requirements and to accommodate overhead line tie-ins with the substation, there have been minor changes to the proposed site layout resulting in SSEN taking the decision to submit a new planning application taking account of these changes.

SSEN would like to extend an invitation to local people and interested parties to attend an exhibition to discuss our plans with the project team and let SSEN know their views on the proposals.

Wednesday
11 July 2018

**Rothienorman
Village Hall**

14:00 – 19:00
