

Shetland HVDC Link 2 - Marine Event

Public Information Session - Portsoy

Scottish and Southern Electricity Networks (SSEN) Transmission is hosting a public information session in Portsoy to share information on the marine aspects of the proposed Shetland HVDC Link 2 project.

This event will provide an overview of the project's marine scope, including potential offshore cable routes and landfall locations along the north-east coast of Scotland, and explain how the forthcoming marine survey and studies will inform the project's design and development.

At the event, we will be sharing details of the studies and assessments planned to support our future consent application, alongside maps, visuals and handouts. Digital versions of all materials will also be available on our project web page.

Interested parties are invited to attend this drop-in session to view and discuss the plans, speak with members of the project team, and share local insight to help inform the ongoing design process.

The consultation event will take place on:

Wednesday 12 November, 3–7pm
Portsoy Church Centre,
15 Seafield Street, Portsoy, AB45 2QL
