

Skye Reinforcement Project – Broadford and Edinbane Substations

Substation Pre-Application Consultation Events

SSEN Transmission invites you to come and share your views with us.

We are launching a pre-application consultation exhibition to gain views and feedback on our proposals for:

- Broadford Substation reinforcement and extension
- Edinbane Substation reinforcement and extension

The proposed substation works are an integral part of the Skye Reinforcement scheme, which will ensure security of supply to homes and businesses and facilitate the connection of renewable energy generation across the region.

During our drop-in events, you will be able to view key project information about our substation reinforcement and extension proposals and there will be opportunity for members of the community to ask questions to the project team and share feedback ahead of submission of planning applications.

Please let us know if you require information in an adapted format such as paper copy, large print or braille and we will work with you to accommodate your preferences. We are happy to accommodate all reasonable requests for adapted communications.

The consultation events will be taking place on:

Thursday 8th September
Skeabost Memorial Hall,
10:00 – 13:00

Broadford Village Hall,
15:00 – 19:00

**Online Virtual
Consultation Event
Monday 12th September
5pm – 7pm**

To find out about how you can join the online virtual consultation event with the live-chat function, visit the Skye Reinforcement website:
