

Spittal – Loch Buidhe – Beaully

400kV overhead line alignment consultation events

We are hosting a series of public events across the project route from 3 June to 20 June 2024. These events form part of the pre-application consultation process for the consent application that will be submitted under section 37 of the Electricity Act 1989.

To support the growth in renewable developments across the north of Scotland, investment in our network infrastructure is needed to connect this power and transport it to areas of demand. This includes a new 400kV overhead line between Spittal and Beaully connecting into new substations near Spittal (Banniskirk Hub), Loch Buidhe (Carnaig) and Beaully (Fanellan).

We will be sharing our potential alignment for the overhead line, with alternative alignment options in some locations, presented through maps and visualisations.

Interested parties can attend our drop-in events to discuss our plans with the project team and share views. Feedback can be provided through printed forms available at the events, the online form available from the project webpage or in email to the Community Liaison Manager. The feedback period will be open until 22 July 2024.

Any comments made to us as the Applicant are not representations to Scottish Ministers as the decision makers. There will be opportunity to make formal representations to Scottish Ministers via the Energy Consents Unit following the submission of the section 37 application.

The events will be held at the following locations:

Substation PAC Consultation Event

Monday 3 June, 2–7pm
Ross Institute,
Halkirk, KW12 6XZ

Tuesday 4 June, 10–12pm
