				probably be the remains of a quarry with subsequent episodes of dumping.							
MHG62766	n/a	HER	Possible hut circle or cairn - Carbisdale Wood	A possible hut circle or cairn in Carbisdale Wood.	Neolithic to Iron Age	Non-designated	n/a	256370	895311	Within Proposed Development	0 m
MHG19071	n/a	HER	Dun-Garbh-Airigh	Farmstead	Unknown	Non-designated	n/a	263700.9324	899003.02	Within 1 km	751 m
MHG20022	n/a	HER	Loch Laro	Corn drying kiln	Unknown	Non-designated	n/a	261929.9998	898960.0002	Within 1 km	1 m
MHG45960	n/a	HER	Loch Laro, General	Loch Laro General View	Unknown	Non-designated	n/a	261949.9997	898939.9998	Within 1 km	1 m
MHG42492	n/a	HER	Puill Fhraoich	Field system of associated township MHG42492 Puill Fhraoich.	Post-Medieval	Non-designated	n/a	261900	898900	Within 1 km	22 m
MHG42486	n/a	HER	Puill Fhraoich	Corn Drying Kiln	Unknown	Non-designated	n/a	261900	898900	Within 1 km	32 m
MHG10324	n/a	HER	Hut circle - Dun-Garbh-Airigh 'A'	Hut Circle	Neolithic to Iron Age	Non-designated	n/a	264357.0597	898852.7812	Within 1 km	867 m
MHG10055	n/a	HER	Garbh-Airigh	An area of 18th - 19th century depopulation named Garbh-airigh. There are footings of four main buildings, dimensions varying from 16m by 4m to 24m by 4m, and a subsidiary footing 7 m by 3.5m. There are a number of accompanying enclosures. The in-field, in which strip cultivation is evident, is bounded by a bank outside of which is a head bank or dyke.	Post-Medieval	Non-designated	n/a	263509.2719	898784.6873	Within 1 km	382 m
MHG40419	n/a	HER	Field system - Dun-Garbh-Airigh	Within a contemporary field system marked by stone clearance heaps and some wasted walls, is a settlement of three hut circles (A - C).	Neolithic to Iron Age	Non-designated	n/a	264595.1184	898753.3611	Within 1 km	400 m
MHG62915	n/a	HER	Hut circle - Dun-Garbh-Airigh 'B'	A hut circle at Dun-Garbh-Airigh. Originally recorded by the OS as hut circle B. Included although slightly out of 1 km study area as it is part of the included field system.	Neolithic to Iron Age	Non-designated	n/a	264549.1334	898722.6288	Within 1 km	640 m
MHG62916	n/a	HER	Hut circle - Dun-Garbh-Airigh 'C'	A hut circle at Dun-Garbh-Airigh. Originally recorded by the OS as hut circle C. Included although slightly out of 1 km study area as it is part of the included field system.	Neolithic to Iron Age	Non-designated	n/a	264641.0716	898702.9965	Within 1 km	577 m
MHG25255	n/a	HER	Garbh-Airigh	A township comprising three unroofed buildings, two enclosures, some fields and a head-dyke is depicted on the 1st edition of the OS 6-inch map. Five unroofed buildings, four enclosures, some field walls and a head-dyke are shown on the current edition of the OS 1:10560 map (1970).	Post-Medieval	Non-designated	n/a	263500	898700	Within 1 km	447 m
MHG62913	n/a	HER	Sheep fold - W of Loch Buidhe	A large circular feature, possibly a sheep fold, to the west of Loch Buidhe, Sutherland. The feature measures c.44m in	Modern	Non-designated	n/a	264982.8882	898533.2937	Within 1 km	326 m

SM2434	n/a	Scheduled Monument	Ardvannie, chambered cairn 100m SW of Woodside	The monument comprises a chambered cairn of prehistoric date, visible as a stony mound. It is being rescheduled to ensure adequate protection is given to all of the archaeological remains. The monument lies in grassland at around 25m OD. The cairn has been roughly circular, now measuring about 23m by 20m by up to 1m in height. The chamber can be seen in a hollow in the SW, defined by at least three large upright slabs. The monument is a burial mound of a type characteristic of the Neolithic.	Neolithic	n/a	268233.3426	887399.9304	Within 10 km	4.90 km
SM4964	n/a	Scheduled Monument	Dun Alascaig, broch	A broch measuring overall 17.3m in diameter with a single course of the outer face occasionally visible.	Iron Age	n/a	265689.6414	886826.6752	Within 10 km	2.39 km
SM10942	n/a	Scheduled Monument	Creag an Fhithich, fort, Dounie Wood	This monument has been descheduled. The site comprises two features; a ditch and earth bank and a stone wall associated with the control of stock animals and dating to the post medieval period.	Unknown	n/a	268459.1714	886769.0131	Within 10 km	5.04 km
SM2390	n/a	Scheduled Monument	Leachonich, two chambered cairns 145m N and 265m NNW of	The monument consists of two burial cairns dating from the late Neolithic or early Bronze Age (around 3500- 2500 BC). The cairns are located on the southeast slope of Struie Hill at 75m and 85m above sea level and have open views to the Dornoch Firth.	Neolithic to Bronze Age	n/a	268440.6083	885884.9017	Within 10 km	5.24 km
SM4962	n/a	Scheduled Monument	Leachonich, broch 100m SE of	The remains of a broch measuring 18.5m in overall diameter with a wall 4.6m wide. The entrance is in the E and to the S of it are traces of an intra-mural cell. The area to be preserved measures 40m in diameter, to include the structure described above and an area around it in which traces of activities associated with	Iron Age	n/a	268118.9224	885463.3674	Within 10 km	5.10 km

Source Reference	Grouped Asset	Asset type	Name	Description	Period	Designation	Grade	Easting	Northing	Nearest Distance to Project
				its use will survive, as depicted in red on the attached map: the scheduled area specifically excludes the modern structure on its N boundary.						
SM4976	n/a	Scheduled Monument	Bravard, cairn, two hut circles & field system 100m N of	A cairn measuring 6m in diameter edged with a kerb of stones. Two hut circles: the northernmost is a platform measuring 7m N-S by 9m.	Neolithic to Iron Age	n/a	267339.5159	885140.9103	Within 10 km	4.45 km
SM2971	n/a	Scheduled Monument	Carriclair, stone circle, cairn and cist 60m NW of Struie View	The monument is the remains of a stone circle, cairn and cist, dating from the Bronze Age (between 2500BC and 800BC). It is visible as an arc of five stones measuring about 13m in diameter, surrounded by the fragmentary remains of a bank and ditch. A cist survives in the interior. When excavated in the 19th century, the interior was covered by a layer of rounded stones, likely the remnants of an overlying cairn. The cist lay below this layer and contained fragments of a decorated urn, pieces of burnt bone, teeth and charcoal. The monument is located on level ground overlooking Cambuscurrie Bay, about 20m above sea level.	Bronze Age	n/a	270898.7426	885119.665	Within 10 km	7.86 km
SM1673	n/a	Scheduled Monument	Clach Chairidh, symbol stone	The monument is a standing stone, decorated with Pictish symbols, situated on a natural eminence in a pasture field on the N edge of Edderton village. The stone stands within a small fenced enclosure approximately 135m SSW of the Ardmore Lodge Hotel (also known as the Edderton Inn). The standing stone itself was erected probably in the Neolithic or Bronze Age period, between about 4000 BC and 1500 BC. It was re-used probably some time between 500 AD and 700 AD when Pictish symbols were carved on it.	Neolithic to Medieval	n/a	270833.1993	885074.5376	Within 10 km	7.82 km
SM4963	n/a	Scheduled Monument	Rhamore, settlement and field system 500m WNW of	A settlement consisting of nine hut circles and contemporary field system.	Neolithic to Iron Age	n/a	267196.0664	884602.6369	Within 10 km	4.56 km
SM1678	n/a	Scheduled Monument	Edderton cross slab, 25m SSW of Edderton Free Church	The monument comprises a single Pictish cross slab, or symbol stone, dating to the 8th or 9th century AD. Formed of red sandstone, the stone measures around 2.3m high, 0.65m wide, and 0.2m thick, tapering slightly towards the top. There is an incised Celtic-style cross on the west face, and a Latin-style cross above a horseman in relief, with two further incised horsemen below, on the east face. The monument is located within the kirkyard of	Medieval	n/a	271911.055	884203.8499	Within 10 km	9.12 km

SM2436	n/a	Scheduled Monument	Kinrive West and Kinrive East, long cairns 150m NNW and 175m N of Mid Kinrive	The monument comprises a pair of long cairns thought to date from the Late Neolithic to Bronze Age (the fourth and third millennia BC). The cairns, of Orkney-Cromarty type, are located on open hillside and lie around 160m above sea level.	Neolithic to Bronze Age	n/a	269949.7102	875388.5355	Within 10 km	9.79 km
SM2965	n/a	Scheduled Monument	King's Head Cairn, chambered cairn 230m WSW of Mid Kinrive	The monument is a chambered cairn probably dating from the Late Neolithic to Bronze Age (around 3800 to 2500 BC). It comprises an exposed central chamber with large side slabs and a displaced capstone, a cist, and the remains of stone cairn material. The cairn is located within mixed woodland and lies around 160m above sea level.	Neolithic to Bronze Age	n/a	269782.2714	875137.2742	Within 10 km	9.65 km
SM4812	n/a	Scheduled Monument	Carn na Feinne, chambered cairn	The remains of a burial chamber consisting of six large slabs enclosing an area of 5.5m by 1.9m.	Neolithic to Iron Age	n/a	261549.775	874795.9619	Within 10 km	1.40 km
SM4700	n/a	Scheduled Monument	Stittenham House, chambered cairn 135m W of	The remains of a chambered cairn consisting of a two compartment burial chamber with portal stones. The cairn measures about 12.5m in diameter.	Neolithic to Iron Age	n/a	264911.1776	874302.5974	Within 10 km	4.80 km

Source Reference	Grouped Asset	Asset type	Name	Description	Period	Designation	Grade	Easting	Northing	Nearest Distance to Project
SM6644	n/a	Scheduled Monument	Boath, three chambered cairns NE and NNE of Easter Ballone Farm	The monuments to the NNE of Easter Ballone farm consist of the remains of three chambered cairns of neolithic date.	Neolithic	n/a	258211.0526	873830.2943	Within 10 km	9 m
SM4750	n/a	Scheduled Monument	Carn na Croiche, chambered cairn	The remains of a chambered cairn measuring about 20m in diameter. Near the centre eight upright stones indicate the position of the burial chamber and passage. The area to be scheduled measures 45m in diameter to include the structures described above and an area around them in which traces of activities associated with their use will survive, as depicted in red on the attached map.	Neolithic to Iron Age	n/a	265614.8252	872211.9256	Within 10 km	6.05 km
SM13640	n/a	Scheduled Monument	Rhicullen training trenches, 200m N and 300m NW of Wester Rhicullen	The monument comprises a complex of training trenches used during the First World War. The trenches are visible as earthworks located on flat land at around 50m above sea level, 3.5km from the wartime training camp at Invergordon.	Modern	n/a	269402.308	872054.8147	Within 10 km	9.36 km
SM5192	n/a	Scheduled Monument	Moultavie, cairn 450m N of	Burial ground; rubble walled burial ground surrounds church;	Neolithic to Iron Age	n/a	263127.9797	871756.0109	Within 10 km	4.26 km
SM5223	n/a	Scheduled Monument	Moultavie, two cairns 850m NW of	The most northerly cairn measures 16m in diameter and up to 1.2m high. There is an almost complete kerb of boulders around its perimeter. The second cairn measures 8.0m in diameter and up to 1.2m high. The site is of national importance because it can give us a greater understanding of prehistoric cairn construction. Pollen and features sealed beneath the cairns can also increase our understanding of the land use immediately prior to its construction.	Neolithic to Iron Age	n/a	262360.4701	871637.3077	Within 10 km	3.84 km
SM5572	n/a	Scheduled Monument	St Ninian's Chapel, Nonakiln	The chapel sits in an old burial ground on rising ground which overlooks the Cromarty Firth to the south. All that survives above ground of the building, which fell in 1714, is the intact W gable. The monument is of national importance because, although fragmentary, it is a chapel of medieval date which is thought to have been dedicated to St Ninian, however the name Noinikil refers to the glebe of the church making the dedication to St Ninian questionable. By preserving the remains of the chapel for future study it may be possible to shed light on the origins and patronage of the chapel. In addition the monument provides evidence and has the potential to provide further evidence through excavation and analysis which may contribute to our understanding of ecclesiastical	Post-Medieval	n/a	266227.7414	871249.6379	Within 10 km	6.52 km

Source Reference	Grouped Asset	Asset type	Name	Description	Period	Designation	Grade	Easting	Northing	Nearest Distance to Project
				architecture and history, toponomy, parish boundaries, burial practices and material culture during the period of its construction and use.						
SM2406	n/a	Scheduled Monument	Millcraig, chambered cairn	Prehistoric ritual and funerary: chambered cairn	Neolithic to Iron Age	n/a	265845.0585	871013.8552	Within 10 km	6.06 km
SM2970	n/a	Scheduled Monument	Carn Liath, cairn, Obsdale	The monument comprises the remains of a cairn, a burial monument likely to date to the late Neolithic or Bronze Age (late third to second millennium BC). It is visible as a low mound of stones, surrounded by a modern stone wall, now lying within an arable field at about 20m above sea level, close to the north shore of the Cromarty Firth. The cairn is round and measures approximately 16m in diameter. The edge of the cairn has been obscured by the later stone dyke that defines its edge. The monument is of national importance because it is a late Neolithic or Bronze Age burial cairn with upstanding cairn material and has considerable potential to make a significant addition to our understanding of early prehistoric burial monuments and funerary practices. Ritual and funerary monuments such as this provide the main material evidence for late Neolithic or Bronze Age society in Scotland. This monument is particularly important as it contains a large central cist, and may contain further secondary burials. The cairn is expected to seal other archaeological features and deposits. Its lowland coastal location makes it particularly important when compared with other examples across this part of the Highlands. Our understanding of the distribution, nature and character of prehistoric burial monuments would be diminished if this monument was to be lost or damaged.	Neolithic	n/a	266620.7938	869520.0956	Within 10 km	5.84 km
SM1675	n/a	Scheduled Monument	Clach a' Mheirlich, symbol stone	The monument consists of a standing stone bearing Pictish symbols, standing approximately 60m N of the shore of the Cromarty Firth. Clach a' Mheirlich, or 'The Thief's Stone', is a sandstone pillar approximately 2m high by 0.5m square, with Pictish symbols incised on the SE and SW sides. The SE side has a 'notched rectangle' symbol approximately one-third of the way up, and the SW side bears, about half way up, worn traces of a crescent symbol with, below, a symbol	Medieval	n/a	268103.5484	869027.8093	Within 10 km	7.02 km

Source Reference	Grouped Asset	Asset type	Name	Description	Period	Designation	Grade	Easting	Northing	Nearest Distance to Project
				which could be either a pair of pincers or a "tuning fork". Clach a' Mheirlich is a Class I stone, and hence probably dates from between the 7th and 9th centuries AD.						
SM4707	n/a	Scheduled Monument	Eileanach Lodge, settlement & field system 550m WSW of	The monument comprises the remains of a settlement of the period before the agricultural improvements with associated enclosures and yards; there are the remains of a long house (measuring 31.6m E-W by 4m transversely with two internal sub-divisions and a porch type door on the south) abutted by two smaller rectangular buildings. There are also the remains of a corn-drying kiln, five further rectangular building foundations, stock enclosures and field walls.	Post-Medieval	n/a	253976.728	868724.4628	Within 10 km	1.30 km
SM5002	n/a	Scheduled Monument	Gun Port, burial mound 45m N of	of Foulis from 1588; various 17th, 18th and 19th century	Post-Medieval	n/a	261894.191	868099.047	Within 10 km	1.23 km
SM5950	n/a	Scheduled Monument	Newhall Point, chapel and burial ground, Balblair	The monument consists of the remains of an early medieval chapel and burial ground on the Black Isle.	Medieval	n/a	270883.1001	867052.9515	Within 10 km	9.40 km
SM4839	n/a	Scheduled Monument	Carn Liath, chambered cairn	The monument comprises the remains of a Neolithic chambered cairn enclosed by a circular rubble wall of relatively recent date. The burial chamber consists of several upright and fallen slabs. The cairn as it survives measures 23m N-S by 21m E-W and up to 1.8m high.	Neolithic	n/a	258942.3482	866559.7135	Within 10 km	774 m
SM4945	n/a	Scheduled Monument	Drumore, farmstead, field system, chambered cairn & cupmarks 600m W of	The monument comprises the remains of a farmstead and field system of the period before the agricultural improvements. There are the remains of a subdivided rectangular house and several associated enclosures and rectangular fields. The monument is of national importance as a well preserved farmstead and field system which has the potential to enhance considerably our understanding of pre-improvement settlement and agriculture. The site is of particular interest because of the survival of much earlier remains; the cairn and the cupmarks have the potential to increase our knowledge of prehistoric burial and ceremonial practices.	Neolithic	n/a	257761.3701	866165.5977	Within 10 km	519 m
SM2969	n/a	Scheduled Monument	Cnoc nan Taibhsean, cairn	None	Neolithic to Iron Age	n/a	267166.6425	866098.5346	Within 10 km	5.73 km
SM13346	n/a	Scheduled Monument	Cullicudden, church and burial ground	The monument is the remains of a late medieval church and its graveyard, which contains a fine collection of carved grave-slabs, some dating from the 14th and 15th centuries. The church is visible as the	Medieval	n/a	264960.0294	865069.919	Within 10 km	3.88 km

Source Reference	Grouped Asset	Asset type	Name	Description	Period	Designation	Grade	Easting	Northing	Nearest Distance to Project
				gable end of an upstanding masonry structure, located within a roughly square graveyard. The monument is located on the Black Isle to the S of the Cromarty Firth at 26m OD. The monument is of national importance as the remains of a late medieval church and burial ground, containing a fine collection of carved grave-slabs and funerary monuments dating from at least the 14th to the 19th century. It can significantly enhance our understanding and appreciation of Scotland's medieval and later church sites. It is of particular importance because of its long chronological range, with the carved stones demonstrating that the site was in use from at least the 14th century. The monument can add to our understanding of developments in memorial practice through periods of significant devotional change, including the Reformation, and concomitant developments in burial and memorial practices, stone carving styles and symbolism. The grave-slab bearing the pierced hand of Christ is a particularly rare survival. The monument would have formed a prominent part of the late medieval landscape and is now a picturesque ruin in the contemporary landscape. The loss of the monument would significantly diminish our ability to understand the origin and development of medieval and later church sites, and the changing nature of burial ritual, memorial practice and sculptural funerary traditions over 500 years, in Ross and Cromarty and further afield.						
SM2396	Strath Sgitheach	Scheduled Monument	Balnacrae, chambered cairn 230m WSW of	The monument is the remains of a chambered cairn dating from the Neolithic period, probably built between 3800 and 2500 BC. It is visible as a group of large upstanding stones defining a chamber and an entrance passage, and is surrounded by a slight scarp that probably indicates the original extent of the cairn. The cairn lies 245m above sea level, part way up the northwest side of Strath Sgitheach. The River Sgitheach is about 600m to the south southeast and there are long views up the strath to the south southwest. The monument is an Orkney-Cromarty type chambered cairn with the chamber aligned northeast by southwest	Neolithic	n/a	253350.1144	864634.6769	Within 10 km	12 m

Source Reference	Grouped Asset	Asset type	Name	Description	Period	Designation	Grade	Easting	Northing	Nearest Distance to Project
				and is defined by several large stones, some upright or leaning, others slumped. The monument has the potential to enhance understanding of the past, in particular the design and construction of burial monuments and the nature of burial practices and belief systems. Ritual and funerary monuments are often our main source of evidence for human activity during the Neolithic in Scotland. They are particularly important for enhancing our understanding of Neolithic society, its organisation, economy, religion and demography. This monument retains its field characteristics to a marked degree. The large upright stones of the chamber are visually impressive and the form of the monument can contribute to our understanding of the development and architecture of chambered cairns. Chambered cairns are an important surviving component of the wider prehistoric landscape of land-use, settlement and ritual and the position of Balnacrae within the landscape is likely to be significant. The loss of the monument would diminish our ability to appreciate and understand the meaning and importance of death and burial in prehistoric times and the placing of cairns within the landscape.						
SM1686	n/a	Scheduled Monument	Craig Castle,tower	Secular: tower	Medieval	n/a	263192.7756	863818.8167	Within 10 km	3.42 km
SM5530	n/a	Scheduled Monument	Cnoc an Teampuill,chapel	The monument consists of the remains of a chapel of unknown date, located on E-sloping ground in an arable field. The monument, known as Cnoc an Teampuill, survives as an oval mound of stone which measures about 21m E-W by 18m N-S and is up to 1.5m high. The monument is of national importance for its potential to contribute to an understanding of the construction and architecture of minor medieval and/or post medieval ecclesiastical buildings. 				<p>of a settlement with a number of cup-marked boulders is unusual, although the significance of this is not known. 1976 survey found: Hut 'A', on a knoll, survives as a platform, c. 11.5m NW-SE by c. 10m bounded by traces of a wall. Several outer facing stones are visible in W arc. The position of the entrance is not evident. 'B' is c. 13m NNW-SSE by c11m between the centres of a wall of indeterminate thickness, with one or two outer and inner facing stones visible in SW arc. The entrance cannot be seen. A field wall joins hut in the SE arc. 'C' is c11.5m NNW-SSE by c9.5m between centres of a wall of indefinite thickness, with outer face visible intermittently around S arc. The mutilated entrance is in SSE. 'D' measures c13m NNW-SSE by c11m between the centres of a wall of uncertain thickness, which has been extensively robbed revealing the inner face of contiguous stones around E arc. Occasional outer facing stones occur around W arc. The entrance in SSE is mutilated. 'E' is c13m NW-SE by c11m between centres of a wall of indeterminate thickness. The ill-defined entrance is in SE. 'F' is c9.5m NW-SE by c7.5m between centres of a wall of indeterminate thickness. The ill-defined entrance is in SE.</p> <p>'G' measures c13m NW-SE by c10m between centres of a denuded wall. The entrance is in SE. About 100m S of hut 'B' are traces of a platform c.12m diameter (marked 'X' on 6" sheet). Around W arc is a discontinuous line of stones, possibly outer wall face of a hut. There are several stone clearance heaps and field walls apparent, particularly in vicinity of huts B, C and D, but no measurable cultivation plots can be seen because of a heavy growth of peat.</p> <p>Visited by OS (N K B) 18 DEcember 1970.</p> <p>Within the settlement and centred at NH 5150 6255 are six cup marked rocks (marked 1 - 6 on 6" plan)</p> <p>1: Has 1 good cup mark and 2 possible cup marks.</p> <p>2: Has 2 good cup marks and 2 possible cup marks.</p> <p>3: At least 6 cup marks, but there is the</p>

				slight possibility that they could be due to weathering. 4: Has 14 good cup marks. 5: Has 8 good cup marks. 6: Has 4 good, and 1 probable, cup marks. Surveyed at 1:10560. Visited by OS (I S S) 13 September 1973.						
SM4728	n/a	Scheduled Monument	Firth View, settlement 1300m NW of	The monument comprises a group of four hut circles and an area around them containing evidence of agricultural activity. Two of the hut circles are already scheduled; this re-scheduling proposal extends protection to the other two and to a larger surrounding area. The hut circles - the foundations for prehistoric timber houses - are loosely grouped together at around 250m OD on a SE-facing hillslope, overlooking upper Strath Sgitheach. The most easterly circle (which lies about 25m from the edge of a large forestry plantation) measures about 11m by 13m, with an entrance on the SSE side. Just over 100m to the NNE lies a second hut circle, of similar size but with no apparent entrance. The monument is of national importance as a well-preserved late pre-historic settlement, which has the potential to provide information about prehistoric domestic and agriculture activities.	Neolithic to Iron Age	n/a	250832.5372	862320.4312	Within 10 km	295 m
SM4773	n/a	Scheduled Monument	Wester Brae, hut circles & field system	The monument consists of a two hut circles and a field system. Hut circle A measures 9m in diameter within a stone wall spread to 2m wide. The entrance lies in the NW. Hut circle B survives as a low stony platform about 8m in diameter. The field system consists of stone clearance cairns and several field walls.	Neolithic to Iron Age	n/a	265375.9642	861742.7062	Within 10 km	6.26 km
SM2312	n/a	Scheduled Monument	Heights of Brae, chambered cairn 375m NNW of Firth View	The monument is the remains of a chambered cairn dating from the Neolithic period, probably built between 3800 and 2500 BC. It is visible as a group of upstanding stones surrounded by a slight bank that probably indicates the original extent of the cairn. The remains lie 245m above sea level on a prominent knoll that stands on the broad ridge separating Strathpeffer to the south and Strath Sgitheach to the north. The monument has potential to make a significant contribution to our understanding of the past, in particular the design and construction of burial monuments and the	Neolithic	n/a	251445.3639	861527.8752	Within 10 km	1.28 km

Source Reference	Grouped Asset	Asset type	Name	Description	Period	Designation	Grade	Easting	Northing	Nearest Distance to Project
				nature of burial practices and belief systems in the Neolithic. Ritual and funerary monuments are often our main source of evidence for human activity during the Neolithic in Scotland. They are particularly important for enhancing our understanding of Neolithic society, its organisation, economy, religion and demography. This monument retains its field characteristics to a marked degree. The large upright stones of the south chamber are visually impressive and the form of the monument, with evidence for multiple chambers, can contribute to our understanding of the development and architecture of chambered cairns. Chambered cairns are an important component in understanding the prehistoric landscape of land-use, settlement and ritual. They are thought often to be positioned with reference to astronomical phenomena, and the orientation and position of Heights of Brae within the landscape is likely to be significant. The loss of the monument would diminish our ability to appreciate and understand the meaning and importance of death and burial in prehistory						
SM2968	n/a	Scheduled Monument	Cille Bhrea, church and burial ground 60m ENE of Waterloo House	The monument is a church and burial ground which served as the parish church of Lamlair until it was united with Kiltarn parish in 1618. The north and west walls of the church are visible as upstanding features. A low bank visible to the northeast of the chapel probably indicates part of the burial ground wall. Excavation shows that buried remains of another rubble bank lie northwest of the chapel. The church stands about 5m above sea level on the north shore of the Cromarty Firth. It is bounded to the southeast by a low, eroding cliff. The monument is of national importance because it has makes a significant contribution to the study of medieval churches, religious practices, and death and burial in Ross-shire. This is particularly the case as the monument may have been a site of Christian worship from the 8th to the early 17th century. The monument retains well-preserved archaeological deposits to a marked degree and offers potential to study a medieval church together with an	Post-Medieval	n/a	257645.313	861502.1382	Within 10 km	4.38 km

Source Reference	Grouped Asset	Asset type	Name	Description	Period	Designation	Grade	Easting	Northing	Nearest Distance to Project
				associated enclosure and burial ground. There is particular potential to study burial practice before and after the Reformation. The monument stands above the Cromarty Firth and would have been a prominent part of the medieval and post-medieval landscape. The loss of the monument would impede our ability to understand the history and development of the parish system and also of burial practice before and after the Reformation in the Highlands.						
SM4559	n/a	Scheduled Monument	Wester Brae, long cairn 650m SSE of	The monument comprises a wedge shaped long cairn. Situated in a forestry plantation, it measures 25m E-W by 13m N-S and up to 1.8m high.	Neolithic	n/a	265654.5778	861392.0454	Within 10 km	6.81 km
SM4841	n/a	Scheduled Monument	Uplands, enclosure 350m NE of	On the summit of Cnoc na Laitch are the remains of a circular enclosure measuring 26.5m in diameter over a low turf covered stony bank. The site is of national importance as a prehistoric enclosed cremation cemetery which can enhance our understanding of prehistoric burial and ceremonial practice. It is of further importance because pollen and features sealed beneath the bank and mound can increase our understanding of the environment and land-use immediately prior to their construction.	Neolithic to Iron Age	n/a	255757.555	861058.8596	Within 10 km	3.98 km
SM13645	n/a	Scheduled Monument	Heights of Brae, boulder containing prehistoric rock art, 110m SSE of Ivy Croft	The monument is an earthfast boulder with two of its faces containing carved prehistoric motifs probably created between about 3500BC and 2500BC. This monument is of national importance because it has an inherent potential to make a significant addition to our understanding of the past, in particular, prehistoric rock art studies in Scotland. The monument is an uncommon variant of the class of monument because it has two decorated panels, each of which contains an unusual assemblage of motifs – cup marks and cup and ring marks, several of which are conjoined by grooves. The monument has the potential to enhance our understanding of the meaning and function of such decorated panels. The loss of the monument would significantly diminish our future ability to appreciate and understand rock art and its place in prehistoric society. 				example of an Iron Age fortification; the central dun is a type of structure more common in the west of Scotland but its combination with banks and ditches is reminiscent of the brochs of Sutherland northward. It is thus of national importance to understanding of the relationship between the various peoples of late prehistoric Scotland and of late prehistoric defensive structures.						
SM5696	n/a	Scheduled Monument	Urquhart, Old Parish Church	The monument consists of the former parish church of Urquhart which is dedicated to St Maelrubha. It is specified in the "Breviary of Aberdeen" that a wooden chapel was built at Urquhart on the spot where St Maelrubha was martyred in 721 and that this church was superseded by the parish church of Urquhart or Ferintosh. The present church, situated in an extended burial ground overlooks the neck of the Cromarty Firth to the N. The monument is of national importance because it is a post-medieval church which, if medieval documentary sources and local traditions are taken into consideration, links the site of the parish church of Urquhart with the martyrdom of St Maelrubha and the erection of a wooden church on the spot in AD 721. The present building is likely to overlie the site of one or more earlier Medieval churches and as such it provides evidence and has the potential to produce further evidence through excavation, for ecclesiastical architecture, early Christian history, burial practices, parish development and material culture. SM3145	n/a	Scheduled Monument	Mulchaich, chambered cairn 80m NE of Auchencairn	The monument is a chambered cairn dating from the late Neolithic period to the early Bronze Age (between 3800 and 2500 BC). The cairn is visible as a mound with exposed kerbs and is located on a grassy knoll overlooking the Cromarty Firth. The monument is of national importance because of its potential to make a significant addition to our knowledge and understanding of the past, particularly the design and construction of burial monuments, and the nature of belief systems and burial practices during the late Neolithic period and early Bronze Age in northern Scotland. The cairn has good field characteristics, allowing us to interpret its form, function and position in the landscape and has potential for the presence of buried archaeological remains, including burials, artefacts and palaeoenvironmental evidence. Architectural features such as the inner and outer kerb and the likely remains of a central chamber are notable. The cup-marked stone forming part of the inner kerb is an unusual feature and adds to the importance of the cairn. There are other cairns in the vicinity of the monument, which together can contribute to our understanding of the form and nature of the prehistoric landscape. This is important for enhancing our understanding of late Neolithic and early Bronze Age society, its organisation, economy, religion and demography. The loss of the monument would significantly diminish our future ability to appreciate and understand funerary practice, death and burial in prehistoric times, and the placing of such monuments within the landscape.
