GDL00303	n/a	Garden and Designed Landscape	Novar	Novar is a major later 18th century formal designed landscape established by military officer, politician and landowner, Sir Hector Munro. It has outstanding architectural and scenic interest for its range of buildings, and extensive planting and parklands. There is outstanding historic interest in its direct association with Munro and the expansion of the British empire in later 18th century India, which is reflected in the physical dimensions of the designed landscape with further evidence from surviving estate plans. Novar is of some	Modern	n/a	261615.6013	868104.2766	Within Proposed Development	0 m

				Archaeological interest as evidenced by the survival within the boundary of a prehistoric burial mound (SM5002) and other recorded sites in the National Record for the Historic Environment). This landscape framework directs long-distance views southeastwards over the lower parklands, across the Cromarty Firth to the Black Isle.						
GDL00023	n/a	Garden and Designed Landscape	Ardross Castle	An important planned 19th century estate landscape, central to the character of the Averon valley. At the core of the landscape are early 20th century formal gardens, including an Edwardian garden designed by Edward White.	Modern	n/a	261503.5888	873881.0574	Within 10 km	236 m
GDL00023	n/a	Garden and Designed Landscape	Ardross Castle	An important planned 19th century estate landscape, central to the character of the Averon valley. At the core of the landscape are early 20th century formal gardens, including an Edwardian garden designed by Edward White, and work by garden manufacturing firms J.M. Blashfield and James Pulham and Sons and the Bromsgrove Guild of Applied Arts.	Modern	n/a	261503.5888	873881.0574	Within 10 km	236 m
GDL00046	n/a	Garden and Designed Landscape	Balnagown Castle	The designed landscape of Balnagown Castle with its parkland, woodland, gardens and architectural features has a long historical connection with the Clan Ross and contains a 19th century Italian garden and an unusual semi-circular walled garden.	Post-Medieval to Modern	n/a	275763.6718	875144.3251	Asset formerly associated with Project Element no longer in consideration	15.00 km
GDL00120	n/a	Garden and Designed Landscape	Cromarty House	An informal 19th century designed landscape, incorporating features surviving from earlier formal landscapes. Although little is known of the Cromarty Castle landscape pre-1753, its form dictated some of the subsequent landscape configuration, an example being the survival of The Causeway (known in the 18th century as Castle Street), the principal approach from town to Castle. The extensive mid 18th century formal landscape was designed by James May (c 1753) and remodeled during the early 19th century.	Post-Medieval to Modern	n/a	279204.8155	866779.5913	Asset formerly associated with Project Element no longer in consideration	17.16 km
CA107	n/a	CONSERVATION AREA	DINGWALL	Surrounded by hills, and situated on the flat estuarial carseland where the River Peffery entered the Cromarty Firth, Dingwall was appreciated for the beauty of its natural setting by the travellers who recorded their impressions of it from the late eighteenth century onwards. The elevated ground at Mitchell Hill, upon	Medieval to Modern	n/a	255049.5913	858767.1337	Within 10 km	4.95 km

MHG20792	n/a	HER	Eilean Na Cabhaig	A farmstead, comprising one unroofed building and an enclosure is depicted on the 1st edition of the OS 6-inch map (Ross-shire & Cromartyshire 1881, sheet lxiv). One enclosure is shown on the current edition of the OS 1:10000 map	Unknown	n/a	256050	869230	Within Proposed Development	0 m
MHG56449	n/a	HER	Possible enclosure wall - Balnarge, Kiltarn	A possible prehistoric or medieval enclosure wall was investigated by J Wordsworth in a watching brief during works to construct a new access track to the Novar Windfarm in 1996. It was seen as a low linear mound under peat and heather., the removal of which revealed a thick podsol lying over a stony bank. Although difficult to measure it was perhaps 0.5m high and 1m wide. Flecks of charcoal were noted in the subsoil on both sides of this feature but only in small quantities and may have resulted from heather burning rather than direct human activity. From the extent of podsolisation and iron-pan formation it was considered likely to be medieval at the latest and possibly prehistoric in date.	Bronze Age to Medieval	n/a	256379.5255	869158.3297	Within Proposed Development	0 m
MHG34246	n/a	HER	Stone dykes - Balnarge, Kiltarn	Several stone dykes near Balnarge, Kiltarn, were investigated during works to construct a new access track to the Novar Windfarm in 1996. Further sections were recorded in 2013.	Post-Medieval	n/a	256655.3818	869092.5736	Within Proposed Development	0 m

MHG56203	n/a	HER	Firing Range - near Evanton Airfield, Alness	A firing range was noted by ARCH's Evanton Wartime Remains project in 2013. Gunnery practice occurred in Glen Glass below Tigh na Craig, using a nearby hill as the target. Kenny Mackenzie remembered that the guns, possibly 25 pounders, were on West End Croft and fired at white targets which were set up on Wyvis ground. The shells fired directly over Auchentounachan (house, spelling unknown) which was occupied by his aunt and uncle. He also recalled that a shell exploded one day at or in a gun, and locally people were told that the gunner was killed. Alex Fraser has seen shrapnel up that way. (Second World War - 1939	Modern	n/a	255140.5794	868841.1587	Within 1 km	146 m

MHG63245	Strath Sgitheach	HER	Cup marked stone - Strath Sgitheach Balnacrae West Lower	The stone is almost rectangular in shape, measuring about 1.6 x 1.0m and rising to a maximum height of 0.2m. A slight ridge runs northeast to southwest across the stone. Sloping down from this ridge, on a slope of 9 degrees SSW, there are 4 cupmarks and an oval depression adjacent to the most southerly of the cups. The cups to the NNE are 7cm apart and both are 5cm in diameter. They form a triangular arrangement with a third cup to the south.	Neolithic to Bronze Age	n/a	252341.7767	863608.7286	Within 1 km	111 m
MHG8905	n/a	HER	Strath Sgitheach	The rectangular enclosure at NH 5274 6366 which is part of a pre-improvement settlement, rest of which lies outside the proposed plantation to N. All the walls of the settlement are completely turf covered spreads of stone which vary between 1 and 2m wide. The settlement consists of a house 18 by 5m, with an attached yard to N. The enclosure runs down the hill to the south and is c. 20 by 20m.	Unknown	n/a	252700	863600	Within 1 km	258 m
MHG8910	n/a	HER	Strath Sgitheach	A large rectangular enclosure has been added to a major N-S field boundary. It is of a similar build (2.0m wide and 0.75m high) as the field wall but appears to be a later addition. Visited June 1989.	Unknown	n/a	252370	863590	Within 1 km	118 m
MHG8907	n/a	HER	Strath Sgitheach	This pre-improvement settlement is centred on a long house (at NH 5315	Unknown	n/a	253150	863580	Within 1 km	507 m

Source Reference	Grouped Asset	Asset type	Name	Description	Period	Designation	Grade	Easting	Northing	Nearest Distance to Project
				6358) which is shown on OS 6-inch map, 1969, but unmapped elements extend up the slope of the plateau which is to be afforested.						
MHG8911	n/a	HER	Strath Sgitheach	A large oval enclosure which is overlain by the field banks which are shown on the OS map. This is very ruinous and in places appears to have been robbed. At NH 5250 6357, incorporated into the circuit of the enclosure is a U-shaped feature measuring c. 10 by 10m. It would appear to be an integral part of the enclosure. Its function is unknown. Visited June 1989.	Unknown	n/a	252550	863570	Within 1 km	228 m
MHG62698	Strath Sgitheach	HER	Hut circle - Strath Sgitheach	Hut circle SS15 at Strath Sgitheach. The Strath Sgitheach area was surveyed by Meryl Marshall in 2020. A group of 12 round houses are northeast of the main track which heads north from the bridge/stepping stones in the upper part of Strath Sgitheach. The round houses are at an altitude of c250m in heathery ground on both sides of a small burn which runs from west to east down a SE facing slope. The following assets are these 12 roundhouses: Canmore 369784, Canmore 369787, Canmore 369790, Canmore 369791, Canmore 369792, Canmore 369793, MHG62693, MHG62694, MHG62695, MHG62696, MHG62697, MHG62698, MHG62699.	Neolithic to Iron Age	n/a	252294.966	863480.0846	Within 1 km	189 m
MHG62702	n/a	HER	Corn-drying kiln - Strath Sgitheach	Corn-drying kiln - to the northeast of a farmstead (SS17), a small corn-drying kiln is built into a bank measuring 4m x 2.5m internally. Related to MHG62701	Post-Medieval	n/a	252453.1474	863479.8842	Within 1 km	282 m
MHG62701	n/a	HER	Farmstead - Strath Sgitheach	Farmstead (SS16) – a hummocky area of grass and heather measuring roughly 20m in diameter has the footings of a farmstead of two indistinct buildings and a corn-drying kiln. The area is in poor peaty/heathery land on the west side of a small burn. The remains of the two buildings are incomplete but generally up to 0.5m high and 0.7m thick, there is some stone composition and the corners of the buildings are square. The larger building is L-shaped and 10m x 3m internally, the smaller 6m x 2.5m. To the NE of the buildings a small corn-drying kiln is built into a bank, it measures 4m x 2.5m internally. Related to MHG62702	Post-Medieval	n/a	252442.803	863468.0716	Within 1 km	276 m
MHG62703	n/a	HER	Farmstead - Strath Sgitheach	Buildings/Farmstead (SS18) – a small grassy well drained area on the lower side	Post-Medieval	n/a	252001.6681	863419.1314	Within 1 km	77 m

Source Reference	Grouped Asset	Asset type	Name	Description	Period	Designation	Grade	Easting	Northing	Nearest Distance to Project
				of an extensive area of enclosed improved land has the incomplete stone footings of two rectangular buildings. The larger building on a SW-NE alignment measures 10m x 2.5m internally, it has squared corners and end walls to 0.5m height. To the south, the smaller one measures 4m x 3m internally, and has footings in the main to 0.3m height but there is no evidence of a west wall.						
MHG50763	n/a	HER	Sheepfold - Strath Sgitheach	Sheep fold Post Medieval - 1560 AD to 1900 AD	Post-Medieval	n/a	252657.4041	863401.6876	Within 1 km	435 m
MHG62697	Strath Sgitheach	HER	Hut circle - Strath Sgitheach	Hut circle SS14 at Strath Sgitheach. The Strath Sgitheach area was surveyed by Meryl Marshall in 2020. A group of 12 round houses are northeast of the main track which heads north from the bridge/stepping stones in the upper part of Strath Sgitheach. The round houses are at an altitude of c250m in heathery ground on both sides of a small burn which runs from west to east down a SE facing slope. The following assets are these 12 roundhouses: Canmore 369784, Canmore 369787, Canmore 369790, Canmore 369791, Canmore 369792, Canmore 369793, MHG62693, MHG62694, MHG62695, MHG62696, MHG62697, MHG62698, MHG62699.	Neolithic to Iron Age	n/a	252106.8571	863397.3052	Within 1 km	155 m
MHG62706	n/a	HER	Enclosure - Strath Sgitheach	Enclosure (SS13) – a substantial rectangular enclosure on heathery slightly sloping ground. The structure is on an E-W alignment and measures 13m x 11m internally. The surrounding earthbanks are substantial and upstanding to 0.8m height and generally 2m width at their base. Internally the enclosure has grass and heather in its upper part but moss and reeds in its lower part. A gap in the banks at the NE corner is possibly an entrance for a supply of water, another gap in the centre of the east wall may have been the exit, leading to the conclusion that this may have been a man made pond. SM2720	n/a	Scheduled Monument	Little Garve, bridge over Black Water	Secular: bridge	Modern	Designated	n/a	239637.3476	862879.4264	Within 10 km	5.12 km
SM1672	n/a	Scheduled Monument	Knock Farril, fort, Knockfarrel, Fodderty	The monument to be scheduled comprises the remains of a vitrified hillfort on a ridge that overlooks Loch Ussie from the N. The monument is of national importance as the remains of a vitrified hillfort which includes the unusual survival of two associated look-out posts. It retains the potential to provide important information about the date and function of this class of hillfort.	Iron Age	Designated	n/a	250496.0496	858526.7821	Within 10 km	1.77 km
SM1676	n/a	Scheduled Monument	Clach an Tiompain, symbol stone	The monument consists of a standing stone of slightly less than 1m in height, one side of which bears incised Pictish symbols and which stands on a low stony mound. The stone, which is known locally as 'Clach an Tiumpain' or 'The Eagle Stone'. The monument is of national importance as a stone bearing Class I Pictish symbols, and hence considered to represent the earliest type of Pictish symbol stone, standing on an artificial mound. It has the potential to enhance our understanding of social structures in the early historic period, as well as contributing to our understanding of the function of these enigmatic monuments.	Medieval	Designated	n/a	248486.6453	858510.7495	Within 10 km	1.71 km
SM13745	n/a	Scheduled Monument	Henge, 135m SW of Fiodh Mhor	The monument comprises the remains of a henge, a ritual or ceremonial monument dating to the later Neolithic or early Bronze Age (the later third or early second millennium BC). It is visible as a low circular earthen bank enclosing a concentric ditch and inner platform with an overall diameter of approximately 21m. The monument makes a significant contribution to our understanding of the prehistoric landscape as a component of a larger complex of related, contemporary sites, reflecting settlement, agriculture, commemoration and ritual	Neolithic to Bronze Age	Designated	n/a	251057.3153	857989.3267	Within 10 km	2.52 km

				activity around the Beaully and Cromarty Firths.							
SM3987	n/a	Scheduled Monument	Loch Kinellan, crannog	Secular: crannog (with post-prehistoric use)	Iron Age to Modern	Designated	n/a	247110.7365	857588.0635	Within 10 km	360 m
SM1667	n/a	Scheduled Monument	Achilty, henge, Contin	Prehistoric ritual and funerary: henge	Neolithic to Bronze Age	Designated	n/a	244111.4578	856922.3415	Within 10 km	1.10 km
SM11056	n/a	Scheduled Monument	Carn na Buaille, fort 750m NNW of Comrie, Contin	The monument consists of a multi-period hill-top fort, situated at around 180m OD in coniferous woodland. This monument is of national importance as the remains of a multi-period fort which has the potential to provide valuable information on defensive architecture, as well as the nature of settlement and economy, from a number of different periods.	Bronze Age	Designated	n/a	241151.4285	856689.7773	Within 10 km	3.86 km
SM2466	n/a	Scheduled Monument	Clachan Corrach, chambered cairn 375m E of Beallach Farm	The monument is the remains of a chambered cairn dating from the Neolithic period, probably built between 3800 and 2500 BC. It is visible as a group of upstanding stones that define a chamber to the west and an entrance passage to the east.	Neolithic	Designated	n/a	248840.3459	856543.7327	Within 10 km	1.28 km
SM3846	n/a	Scheduled Monument	Whiteleys, chambered cairn 300m SW of Craig Ruadh	The monument is the remains of a Neolithic chambered cairn probably built between 3800 and 2500 BC. It is visible as a group of large stones, around seven of which define a polygonal chamber. The monument has potential to make a significant contribution to our understanding of the past, in particular the design and construction of prehistoric burial monuments. It continues to be visible as an upstanding field monument, and unlike some other cairns in the area the mound around the chamber remains an upstanding feature. Chambered cairns are often our main source of evidence for the Neolithic in Scotland, and can enhance our understanding of Neolithic society and economy, and as well as the nature of burial practices and belief systems. This chambered cairn is one of an important group of well-preserved Neolithic burial monuments close to the coast between Beaully and Brora. They are important surviving components of what would have been a wider prehistoric landscape of settlement, agriculture	Neolithic	Designated	n/a	253042.9443	856510.9924	Within 10 km	4.82 km

Source Reference	Grouped Asset	Asset type	Name	Description	Period	Designation	Grade	Easting	Northing	Within Buffer	Nearest Distance to Project
				and ritual. The loss of the monument would diminish our ability to appreciate and understand the meaning and importance of death and burial in prehistoric times and the placing of cairns within the landscape.							
SM2397	n/a	Scheduled Monument	Preas Mairi, chambered cairn	Prehistoric ritual and funerary: chambered cairn	Neolithic to Iron Age	Designated	n/a	246083.7648	855847.233	Within 10 km	634 m
SM3839	n/a	Scheduled Monument	Brahan Wood, chambered cairn 835m NW of Brahan House	The monument is the remains of a chambered cairn dating from the Neolithic period, probably built between 3800 and 2500 BC. It is visible as a group of large stones that define a two-compartment chamber. The cairn lies 150m above sea level, on a terrace near the top of a south facing slope above the valley of the River Conon. This monument has potential to make a significant contribution to our understanding of the past, in particular the design and construction of pre-historic burial monuments. It continues to be visible as an upstanding field monument, and with a two compartment chamber this cairn shows a different form to many other examples in the area. Chambered cairns are often our main source of evidence for the Neolithic in Scotland, and can enhance our understanding of Neolithic society and economy, and as well as the nature of burial practices and belief systems. This chambered cairn is one of an important group of well-preserved Neolithic burial monuments close to the coast between Beaully and Brora which represent an important surviving component of what would have been a wider prehistoric landscape of settlement, agriculture and ritual. The loss of the monument would diminish our ability to appreciate and understand the meaning and importance of death and burial in prehistoric times and the placing of cairns within the landscape.	Neolithic	Designated	n/a	250465.1527	855215.3463	Within 10 km	3.13 km
SM1666	n/a	Scheduled Monument	Conon Bridge, henge 230m NE of Riverford	This monument is a very well preserved henge, or ritual enclosure, of prehistoric date. The henge is about 26-26m in diameter. The monument is of national importance for its potential contribution to an understanding of prehistoric ritual and	Neolithic to Iron Age	Designated	n/a	254292.9126	855070.7292	Within 10 km	4.56 km

				religious practices. The monument is extremely well preserved and important archaeological deposits will almost certainly survive within sealed archaeological features.							
SM2500	n/a	Scheduled Monument	David's Fort, homestead moat, Balavil Wood	Secular: homestead moat	Medieval	Designated	n/a	253940.9069	853288.3994	Within 10 km	3.09 km
SM4741	n/a	Scheduled Monument	Balvaird Wood, chambered cairn 450m NNE of East End	The monument comprises the remains of a chambered cairn consisting of five upright slabs delineating the chamber and three further slabs indicating the entrance passage. The cairn material is spread and scattered to the S of the chamber and a modern dyke overlies the cairn on the E. The monument is of national importance because it is a good example of an Orkney-Cromarty chambered cairn of the polygonal chamber type, because it can give us a greater understanding of Neolithic burial practice and, through the pollen in the underlying old ground surface, of the vegetation and farming practices of the period immediately preceding its construction.	Neolithic	Designated	n/a	254128.2591	852796.8833	Within 10 km	3.07 km
SM3403	n/a	Scheduled Monument	Dugary, henge 425m SE of	The monument is the buried remains of a henge and a timber circle, which are Neolithic or early Bronze Age ceremonial structures probably dating to between around 3100 BC and 1700 BC. The monument is of national importance because of its potential to make a significant addition to understanding of ceremony and ritual during the Neolithic period. It is likely that deposits survive in the ditch, within and beneath the remnants of the upcast bank and within the postholes of the timber circle that can help us understand the chronology, development and function of such monuments. The presence of a small timber circle within the henge, which is likely to pre-date the construction of the henge ditch and bank, combined with the evidence for multi-phased activity from excavations of henge monuments elsewhere, indicate this monument is likely to have had an extended developmental sequence. Henge monuments and timber circles are a key sources of evidence for the	Bronze Age	Designated	n/a	252322.7879	852671.7458	Within 10 km	1.45 km

				Neolithic/early Bronze Age in Scotland, and can enhance our understanding of Neolithic/early Bronze Age society and economy, as well as the nature of ceremony, ritual and belief systems. They would have been an important component of the wider prehistoric landscape of settlement, agriculture and ritual. The loss of the monument would diminish our ability to appreciate and understand the meaning and importance of ceremony and ritual during the Neolithic/early Bronze Age and the placing of henge monuments within the landscape.							
SM4565	n/a	Scheduled Monument	Drumrunie, chambered cairn 170m WNW of Drumrunie Cottage	The remains of a chambered round cairn spread over an area of 22m in diameter. In the centre a single slab is all that is visible of the original chamber. The monument is of national importance because it can give us a greater understanding of prehistoric burial practices and, through the pollen preserved in the underlying old ground surface, of the vegetation and farming practices of the period immediately prior to its construction.	Neolithic to Iron Age	Designated	n/a	255004.0504	852597.3655	Within 10 km	3.84 km
SM4652	n/a	Scheduled Monument	Muir of Conon, chambered cairn 630m ENE of East End	The monument consists of the remains of a chambered cairn 20m in diameter with a burial chamber at its centre. The area to be scheduled includes ground in which traces of activities associated with the construction and use of the cairn will survive and measures 40m in diameter and is bounded on the NW by, but excludes, a dyke. The monument is of national importance because of its potential to contribute to an understanding of prehistoric upland settlement and economy.	Neolithic to Iron Age	Designated	n/a	254611.0386	852497.5184	Within 10 km	3.42 km
SM3122	n/a	Scheduled Monument	Cairn Irenan, chambered cairn	The monument is a chambered cairn surrounded by the remains of a stone circle, dating from the late Neolithic or early Bronze Age (fourth to third millennia BC). It is visible as an outer kerb of stones. The monument is of national importance because of its potential to make a significant addition to our knowledge and understanding of the past, particularly the design and construction of burial	Neolithic to Bronze Age	Designated	n/a	256660.7901	852295.9667	Within 10 km	5.42 km

Source Reference	Grouped Asset	Asset type	Name	Description	Period	Designation	Grade	Easting	Northing	Within Buffer	Nearest Distance to Project
				monuments, and the nature of belief systems and burial practices during the late Neolithic and early Bronze Age in Ross and Cromarty. It retains its field characteristics to a marked degree including the surviving structural form of stone kerbs, passageway and remains of a stone circle. There is no record of any previous excavation, suggesting high potential for the survival of important archaeological evidence. The well-defined field characteristics of this cairn allow us to interpret its form, function and position in the landscape. The monument, together with other broadly contemporary sites in the vicinity, can give insights into the nature of the Neolithic landscape and add to our understanding of social organisation, land use and ritual within Ross and Cromarty in the late Neolithic and early Bronze Age. Clava type cairns are only situated in the Inverness-shire area and loss of the monument from within this relatively small distribution area would significantly diminish our ability to appreciate and understand structures and practices associated with death and burial in prehistory.							
SM4676	n/a	Scheduled Monument	Croftcrunie, enclosed cremation cemetery 175m S of	The monument comprises a circular bank of earth and stones up to 4m wide and 0.4m high enclosing an area of 20m in diameter with a disturbed stony mound at its centre. There is an entrance through the bank in the SE arc. The area to be scheduled includes the structures described above and an area in which traces of activities associated with its construction and use will survive as depicted in red on the attached map. It measures 40m in diameter and is bounded on the NE by but excludes a fence as delineated in red on the attached map.	Neolithic to Iron Age	Designated	n/a	261059.6632	852072.4658	Within 10 km	9.78 km

SM3123	n/a	Scheduled Monument	Carn Glas, cairns, Mains of Kilcoy	Prehistoric ritual and funerary: cairn (type uncertain)	Neolithic to Iron Age	Designated	n/a	257756.5452	851872.3887	Within 10 km	6.46 km
SM13629	n/a	Scheduled Monument	Achnasoul, medieval earthwork 440m SSE of	The monument is a moated enclosure of probable medieval date. It is visible as a large earthwork comprising a ditch and concentric internal and external banks, which together enclose a sub-circular area measuring around 43m northwest-southeast by 39m northeast-southwest. This monument is of national importance because it makes a significant addition to our understanding of the past, in particular the date, use and development of moated homesteads in the north of Scotland. Moated homesteads are a relatively rare type of monument in Scotland, with few examples identified in highland areas of Scotland. The example at Achnasoul is impressive and retains its field characteristics. Moated homesteads are interpreted as local power centres in the medieval period and as such this monument would have been an important component of the wider medieval rural landscape. The loss or damage of the monument would diminish our ability to appreciate and understand the character of medieval rural settlement, including the extent and nature of the feudalisation of this part of Scotland, and the structure and organisation of society and economy more widely during this period.	Medieval	Designated	n/a	248807.9798	851820.7313	Within 10 km	1.08 km
SM4606	n/a	Scheduled Monument	Kilcoy North, chambered cairn 750m NW of Kilcoy Castle	The monument consists of the remains of a chambered cairn measuring 20m in diameter and 1.4m high. Near the centre are the remains of a two compartment burial chamber. The monument is of national importance because it is one of a concentration of chambered cairns in the area which can contribute towards a better understanding of the first farmers burial practices and, through the pollen preserved in the underlying old ground surface, of the vegetation and farming practices of the period immediately prior to its construction.	Neolithic to Iron Age	Designated	n/a	257038.9028	851738.0151	Within 10 km	5.75 km

SM13523	n/a	Scheduled Monument	Urchany, barrow 595m SW of	The monument is a prehistoric burial monument dating probably to the 2nd millennium BC (Bronze Age). It appears to be a bowl barrow with an external ditch and bank, which is a rare form of burial monument in Scotland. The monument is a prehistoric burial monument dating probably to the 2nd millennium BC (Bronze Age). It appears to be a bowl barrow with an external ditch and bank, which is a rare form of burial monument in Scotland. The monument has an inherent potential to contribute to our understanding of the form, function and distribution of Bronze Age burial monuments, which are an important part of Highland's prehistoric landscape. The loss of this monument would significantly diminish our ability to appreciate and understand the placing of such monuments within the landscape and the meaning and importance placed on of death and burial in prehistoric times.	Bronze Age	Designated	n/a	244268.463	845506.6789	Within 10 km	781 m
SM4979	n/a	Scheduled Monument	Dun Mor,fort	The monument known as Dun Mor is a sub-oval fort of the Iron Age measuring c 22m NNE-SSW by 16m within a tumbled wall between 4.5m and 6.0m wide with outer and inner faces sporadically visible around most of the perimeter. The entrance is in	Iron Age	Designated	n/a	245737.4837	845149.9858	Within 10 km	201 m

Source Reference	Grouped Asset	Asset type	Name	Description	Period	Designation	Grade	Easting	Northing	Within Buffer	Nearest Distance to Project
				the south east. The monument is of national importance as a well preserved example of a prehistoric fort; it is of particular interest because of the existence of additional outer defences on the most accessible sides. It has the potential to enhance considerably our understanding of prehistoric settlement and defensive structures.							
SM11880	n/a	Scheduled Monument	Tom-a'-Caisteal, castle 400m S of Kirkton	The monument comprises the remains of a small later medieval castle situated on the crest of a small rocky hill in woodland to the S of Kirkton Farm, approximately 1km S of the shore of Beaully Firth. Its oval-shaped summit has two levels, the higher being on the W. Overall, the top measures 40m from E to W by 18m transversely. On the N edge of the summit is a roughly rectangular hollow measuring about 16m from E to W by 3m, bounded on the N with an overgrown rubble wall 0.3m high and sub-divided by another rubble wall. There is a similar structure at the E end of the site at the lower level. It measures approximately 9m by 4m and has a 1m break in the S side. Both of these two rectangular depressions are interpreted as buildings. Abutting the S end of the larger, northernmost building is a hollow which seems to have been enclosed by a bank or wall, but its purpose is uncertain. Traces of a wall are to be found round part of the W edge of the summit.	Medieval	Designated	n/a	260449.022	844894.7788	Within 10 km	9.69 km
SM3195	n/a	Scheduled Monument	Corff House, fort SW of	Prehistoric domestic and defensive: fort (includes hill and promontory fort)	Neolithic to Iron Age	Designated	n/a	251381.9287	844786.7248	Within 10 km	2.29 km
SM5570	n/a	Scheduled Monument	Kiltarlity Old Parish Church	The monument consists of the remains of the sixteenth century parish church of Kiltarlity, which may have succeeded an earlier one on the same site. The dedication is said to have been to Thalargus (Talorgan) or, according to another account to "Tarrail". It is situated in an old graveyard on the S bank of the River Beaully.	Post-Medieval	Designated	n/a	249743.66	843928.2074	Within 10 km	1.75 km
SM932	n/a	Scheduled Monument	Balblair Stone, symbol stone, Moniak Castle Wineries	The monument comprises an earthfast, upright carved stone bearing abstract and figurative	Neolithic to Medieval	Designated	n/a	255171.7031	843583.4817	Within 10 km	5.49 km

Source Reference	Grouped Asset	Asset type	Name	Description	Period	Designation	Grade	Easting	Northing	Within Buffer	Nearest Distance to Project
				carving which is prehistoric and early medieval in date. It stands within a modern garden rockery immediately to the SW of Moniak Castle. Contextual characteristics: During the Early Bronze Age in the region, the carving of individual standing stones and the stones that line burial monuments was a relatively common practice. The circular depressions or cupmarks that are just one of many apparently abstract forms are often connected not just with other monuments, but the wider landscape in which they survive. This is the case with rock outcrops and earthfast boulders like the Balblair stone. This is a good example of this simple, but nonetheless important type of rock art. It has a part to play in our understanding the wider landscape during prehistory, since it belongs to a geographically important group of broadly contemporary monuments along Strathnairn and the Moray Firth. The monument is of national importance because it has an inherent potential to add to our understanding of the past, in particular the culture of the Picts in Invernesshire and the integration of a carved, prehistoric monument into their society. This potential is enhanced by the well-preserved field characteristics of the monument surviving today. Single Pictish carving of humans is unusual among the range of artwork seen during the 6th to 9th centuries AD. It is even more unusual to find prehistoric and Pictish carving on the same stone.							
SM2423	n/a	Scheduled Monument	Dun Mor,fort,Ballindoun	Prehistoric domestic and defensive: fort (includes hill and promontory fort)	Iron Age	Designated	n/a	253441.2795	842904.4964	Within 10 km	4.84 km
SM4729	n/a	Scheduled Monument	Phoineas Hill,enclosure 900m ESE of Phoineas House	Prehistoric domestic and defensive: enclosure (domestic or defensive). The monument comprises the remains of an enclosure measuring 120m NE- SW by 80m transversely, formed by building a wall across the accessible SW approach to a promontory. The monument is of national importance as an unusual and distinctive form of enclosure, which has the potential to enhance	Neolithic to Iron Age	Designated	n/a	253353.3684	842554.2842	Within 10 km	5.10 km

Source Reference	Grouped Asset	Asset type	Name	Description	Period	Designation	Grade	Easting	Northing	Within Buffer	Nearest Distance to Project
				considerably our understanding of early settlement.							
SM2435	n/a	Scheduled Monument	Belladrum, chambered cairns 250m NNE of Brockie's Lodge	Prehistoric ritual and funerary: chambered cairn. The monument consists of two burial cairns probably dating from the early Bronze Age (2500BC to 1500BC). The main cairn is visible as a low grassy mound about 14m in overall diameter with a kerb of boulders. The adjacent cairn lies about 25m to the north and is visible as a curvilinear bank about 25m in length and up to 1.2m high. The monument is of national importance because it has inherent potential to make a significant contribution to our understanding of the past, in particular the design, construction and use of burial and ceremonial monuments. It retains its field characteristics to a marked degree; the surviving structural form of the outer kerb of the Clava-type cairn and the remains of the adjacent probable cairn are all important features. There is no record of any previous excavations, suggesting high potential for the survival of important archaeological evidence. Clava-type cairns are a regionally distinctive class of early Bronze Age monuments, and the significance of the cairn at Belladrum is enhanced by its close proximity to a second potentially earlier cairn, and also to other cairns in the area; together, these monuments are an important source of evidence of the nature of early Bronze Age belief systems, ceremonial and funerary practices, as well as society and economy. The loss of the monument would diminish our ability to appreciate the related monuments in the vicinity and, more widely, understand the meaning and importance of ceremony and ritual, death and burial in the early Bronze Age. Our understating of the placement of funerary and ceremonial monuments within the landscape during prehistory would also be diminished.	Bronze Age	Designated	n/a	251416.5918	842120.3836	Within 10 km	3.31 km
SM4653	n/a	Scheduled Monument	Castle Spynie, broch	Prehistoric domestic and defensive: broch. The monument comprises the	Iron Age	Designated	n/a	254172.6063	842052.6314	Within 10 km	5.96 km

Source Reference	Grouped Asset	Asset type	Name	Description	Period	Designation	Grade	Easting	Northing	Within Buffer	Nearest Distance to Project
				remains of a broch, measuring overall 19.5m in diameter within a wall measuring 4.0m wide and 1.0m high with inner and outer faces occasionally visible. The entrance is in the south west. The site is of national importance because it is a good and well preserved example of an Iron Age broch; it is of particular interest because of the survival of outer defensive works, which utilise natural rock outcrops. It has the potential to enhance considerably our understanding of Iron Age settlement and the development of brochs.							
SM2425	n/a	Scheduled Monument	Culburnie, ring cairn & stone circle	Prehistoric ritual and funerary: ring cairn	Neolithic to Iron Age	Designated	n/a	249180.1881	841809.6194	Within 10 km	1.39 km

SM5004	n/a	Scheduled Monument	Erchless Castle, dun 650m WNW of	Prehistoric domestic and defensive: dun. The monument comprises the remains of a sub-circular dun of the Iron Age, measuring 12.3m NE-SW by 13m transversely within a tumbled wall 2.6m wide with inner and outer faces occasionally visible. The monument is of national importance as a well preserved dun which has the potential to enhance considerably our understanding of Iron Age settlement and defensive structures.	Iron Age	Designated	n/a	240439.9187	841035.7082	Within 10 km	4.58 km
SM4744	n/a	Scheduled Monument	Auchvaich, chambered cairn 650m W of	Prehistoric ritual and funerary: chambered cairn. The monument comprises the remains of a Neolithic chambered cairn; the two compartment burial chamber now survives as four upright stones and nine fallen stones with an entrance from the east. The cairn material has been reduced to a rubble scatter	Neolithic	Designated	n/a	252361.6127	840391.5965	Within 10 km	4.81 km

Source Reference	Grouped Asset	Asset type	Name	Description	Period	Designation	Grade	Easting	Northing	Within Buffer	Nearest Distance to Project
				suggesting an original diameter of about 16m. The monument is of national importance because it is a type of chambered cairn which is uncommon in this area. It has the potential to enhance considerably our understanding of prehistoric burial and ceremonial practices; additionally pollen and features sealed beneath the cairn material can give us further information of land use and environment immediately prior to the cairn construction.							
SM4608	n/a	Scheduled Monument	Lochlait, settlement & field systems 400m N of	Prehistoric domestic and defensive: field or field system. The monument consists of eleven round houses within a field system, set into sloping ground. The monument is of national importance as a fine example of a prehistoric nucleated settlement and associated field system which has the potential of increasing knowledge of prehistoric house types and farming practices in the 2nd and 1st millennia BC.	Neolithic to Iron Age	Designated	n/a	254971.5468	836222.0658	Within 10 km	9.30 km
SM4335	n/a	Scheduled Monument	Cnocbreac, hut circle and field system 745m NW of	Prehistoric domestic and defensive: hut circle, roundhouse. The monument comprises the remains of a hut circle and part of an adjacent field system near the foot of the SE-facing slopes of Druim Ba, now situated in a forestry clearing 745m NW of Cnocbreac. The hut circle appears as a low turf-covered mound with several large protruding stones. This monument is of national importance because it has an inherent potential to make a significant addition to our understanding of the past, in particular domestic and agricultural life in the Bronze Age period. Apparently undisturbed, this hut circle and its adjacent field system offer good potential for the preservation of archaeological deposits relating to their construction, the everyday lives and activities of the occupants, and the abandonment of the area in the Bronze Age. The loss of the monument would significantly diminish our future ability to appreciate and understand the	Bronze Age	Designated	n/a	252849.8441	834790.64	Within 10 km	9.13 km

Source Reference	Grouped Asset	Asset type	Name	Description	Period	Designation	Grade	Easting	Northing	Within Buffer	Nearest Distance to Project
				everyday lives of Bronze Age communities.							
SM11458	n/a	Scheduled Monument	Loch nam Bat, still 1790m N of Wester Balnagrantach	Industrial: distilling. The monument comprises an illicit whisky still, between 250 and 100 years old, situated in wooded moorland and hidden tight into a shallow rocky gully which drains into the nearby loch.	Modern	Designated	n/a	249330.9414	833353.5309	Within 10 km	9.00 km
SM11455	n/a	Scheduled Monument	Loch nam Faoileag, hut circles 730m NNW of Wester Balnagrantach	The monument comprises three hut circles, between 4000 and 1500 years old, situated on a gently sloping terrace in moorland on a hillside. The hut circles are between 7.1 m and 5.8 m in diameter internally, within stony banks 0.3 m high which have spread to 2 m in places, but have defined, exposed faces of coursed masonry visible in others. All are scooped into the hillside, which is dotted with at least 20 small clearance cairns. There is also an enclosure bank surrounding the hut circles and most of the cairns. A modern pipe trench and adjacent services trackway, cumulatively 3 m wide, traverses the terrace, separating one of the hut circles from the others.	Bronze Age to Iron Age	Designated	n/a	249104.5697	832266.6892	Within 10 km	9.94 km
SM11456	n/a	Scheduled Monument	Achratagan, hut circle and cairnfield 790m NNE of	The monument comprises a hut circle and associated field system, between 4000 and 1500 years old, situated on the edge of a terrace on a hillside moor. The hut circle is oval in plan, measuring 11.4 m from NW to SE by 9.1 m transversely, within a stony bank 2.1 m thick and 0.5 m high and with an entrance to the SE. The ground surface of the lower part of the slope has been built up to provide a level interior for the structure. There are numerous contemporary clearance cairns, measuring up to 6 m in diameter, covering the rest of the terrace, and on the slope below the hut circle. A relatively recent shooting butt is also located on the terrace amidst the cairns.	Bronze Age to Iron Age	Designated	n/a	244793.0316	832256.1868	Within 10 km	9.57 km
SM4594	n/a	Scheduled Monument	The Temple, chambered cairn 600m NE of Croftcrunie Farm House	The monument consists of the remains of a chambered cairn measuring 27m in diameter. Near its centre three large slabs are all that is left of the burial chamber. Field clearance lies on its S and E sides and there are many large stones on it.	Neolithic	Designated	n/a	261801.8494	852601.1692	Asset formerly associated with Project Element no longer in consideration	10.56 km

				The area to be scheduled includes the structures described above and an area in which traces of activities associated with its construction and use will survive measuring 40m in diameter as depicted in red on the attached map.							
SM5469	n/a	Scheduled Monument	St John's Chapel, Allangrange	The monument consists of the remains of a chapel, dedicated to St John, which date from the late thirteenth century. The chapel, alleged to have belonged to the Knights Templar, sits in a small walled enclosure 100m NE of Old Allangrange House. Its upstanding remains consist of the E gable and part of the adjoining side walls. The W wall has been removed and replaced with railings. A central gate gives access to the nave of the chapel which is now used as a burial ground for the Fraser-Mackenzie's of Allangrange.	Medieval	Designated	n/a	262524.3848	851500.3315	Asset formerly associated with Project Element no longer in consideration	11.24 km
SM7817	n/a	Scheduled Monument	Coul Point, crannog 1030m SW of	The monument comprises the remains of a prehistoric crannog surviving as a stone cairn on intertidal mudflats. The monument is a low oval cairn of stones which is fully submerged at high tide. No timbers in the body of the cairn have been noted, but these may survive as is the case on the other three intertidal crannogs so far known in the Beaully Firth.	Neolithic to Iron Age	Designated	n/a	261015.751	847643.1764	Asset formerly associated with Project Element no longer in consideration	10.01 km
SM3105	n/a	Scheduled Monument	Coul Point, crannog 750m S of (formerly Carn Dubh)	The monument comprises the remains of a prehistoric crannog surviving as a mound of stones and estuarine sand on intertidal mudflat in the Beaully Firth. The crannog is submerged at high tide. The monument is a low mound of stone, about 75m E-W by 45m-50m N-S. Its oval plan consists of a central mass, an E crescent and a W margin of boulders. Some areas of the site consist of estuarine sand and silt but other areas are formed of boulders, cobbles and pebbles. Among the boulders and pebbles the remains of substantial horizontal and vertical timbers are visible and organic remains are evident on site.	Neolithic to Iron Age	Designated	n/a	261777.6319	847354.4455	Asset formerly associated with Project Element no longer in consideration	10.74 km

SM11438	n/a	Scheduled Monument	Garbeg Cottage, settlement 1250m N of	This monument comprises two groups of sub-rectangular/oval and circular hut foundations, the footings of prehistoric or early historic houses between 4000 and 1000 years old. They lie in rough moorland on opposing sides of a shallow valley sitting amongst the upper reaches of a wider valley.	Iron Age to Medieval	Designated	n/a	250837.3915	832708.7903	Asset formerly associated with Project Element no longer in consideration	10.08 km
LB7826	n/a	Listed Building	CASTLE LEOD	Circa 1600 with additions dated 1616. 5-storey tower house, Built by Sir Roderick Mackenzie of colgach, (Tutor of Kintail).	Post-Medieval	Designated	A	248603	859325	Within 10 km	1.09 km
LB1789	n/a	Listed Building	CONTIN BRIDGE OVER RIVER BLACK WATER.	Thomas Telford, 1812/3 High arched bridge, rubble; Carries A832 road. First Parliamentary bridge destroyed by flood in 1811 replanned and rebuilt in 1812 by the Parliamentary Commissionery at Telford's insistence.	Modern	Designated	A	245403	856672	Within 10 km	23 m
LB1769	n/a	Listed Building	COUL HOUSE HOTEL FORMERLY COUL HOUSE	1821, additions Alexander Ross, 1860. Unusual villa of 1821 centred on 2 octagons, 1 to south of 2 storeys with 2-bay wings.	Modern	Designated	A	246249	856404	Within 10 km	373 m
LB14906	n/a	Listed Building	KINKELL CASTLE AND SURROUNDING WALL AND STUDIO COTTAGE	Dated 1594, Z-plan tower house, harled with dressed margins, 3 storeys and attic, with circular stair tower at south-west. Wall surrounding castle, stone. Studio cottage, small, single-storey, stone-built, vents at rear and modern fenestration at front; slated roof. Dated 1594 at keystone of hall fireplace at first floor.	Post-Medieval	Designated	A	255388	854333	Within 10 km	4.92 km
LB14030	n/a	Listed Building	FAIRBURN TOWER	Fairburn Tower is a 16th century tower-house with early 17th century additions, located on a ridge between the Rivers Conon and Orrin. Restored, 2020-22. The tower occupies a commanding position on a hilltop ridge overlooking Strathconon and the Orri valley. A former stronghold of the Mackenzies, the tower was probably built for Murdo Mackenzie after he received a charter for the lands with the understanding that he built a house there.	Post-Medieval	Designated	A	246952	852356	Within 10 km	533 m
LB8007	n/a	Listed Building	KILCOY CASTLE	Circa 1620, large Z-plan tower. De-scheduled 2 September 1997.	Post-Medieval	Designated	A	257662	851236	Within 10 km	6.39 km
LB7815	n/a	Listed Building	KIRKHILL, OLD WARDLAW CHURCH WITH LOVAT BURIAL	There are two location included under a single entry a church and burial ground. Former Wardlaw Parish church of which only rectangular	Post-Medieval	Designated	A	254967	845705	Within 10 km	4.22 km

			AISLE AND BURIAL GROUND	burial aisle at west of 1634 survives, with belfry dated 1722. 1634 rectangular burial aisle, possibly incorporating earlier core. Maryhill or Kirkhill the site of the former Wardlaw Parish Church. Kirkhill parish consists of the united parishes of Wardlaw and Farnua (see entry for Kirkton). Lovat Burial aisle served the Lovats of Beaufort until the RC Church of St Mary's Eskadale was built in 1826, where they now have a burial ground. Pedimented murla memorial to Thomas Lord Fraser of Lovat erected by his son Simon. The 3 Fraser ministers of Kirkhill buried closed together were Rev Alexander Fraser (1749-1802), Rev. Donald (1783-1836) and Rev. Alexander (d.1883, "care out" at Disruption), Grandfather, father and son.							
LB52377	n/a	Listed Building	Cruck Cottage, excluding 20th century timber boarded addition to southwest, Fingask Drive, Kirkhill	Probably second half of the 18th century, with 19th and early 20th century alterations to the interior. Single storey, 3-bay traditional cruck-framed cottage. The Cruck Cottage at Kirkhill is an outstanding and rare example of a traditional dwelling, once common to the Highlands and the northeast of Scotland, but now extremely rare. While there has been some alteration to the interior the building has not been substantially changed since the early 20th century and there is extensive survival of late 18th and early 19th century fabric and construction methods. The building has a tangible connection with 18th century life in the Highlands and is thought to have an association with the Jacobite Risings. The single-storey croft house or cottage, constructed using the same traditional methods over an extensive period, was a mainstay of 17th, 18th and 19th rural settlements in Scotland. Their survival into the 21st century is now extremely rare and those which still evidence traditional construction techniques,	Post-Medieval to Modern	Designated	A	255493	845702	Within 10 km	4.72 km
LB7815	n/a	Listed Building	KIRKILL, OLD WARDLAW CHURCH	There are two location included under a single entry a church and burial	Post-Medieval	Designated	A	254966	845680	Within 10 km	4.22 km
