# East Coast 400kV Phase 2 Public consultation events

SSEN Transmission are developing proposals between Kintore and Tealing via Fiddes to build a new 400kV connection between these sites enabling the significant power transfer capability needed to take power from onshore and large scale offshore renewable generation connecting on the east coast of Scotland.

The East Coast 400kV Phase 2 project will seek to establish a new 400kV network and reinforce sections of the existing electricity transmission infrastructure.

We are inviting members of the public and all interested parties to attend our drop-in consultation events and give their views on the following proposed projects:

**Kintore – Tealing 400kV OHL  
(overhead line)**

**Tealing 400kV substation**

**Fiddes 400kV substation**

**Alyth – Tealing OHL Re-conductor**

**Tealing – Westfield OHL Re-conductor**

**Come along to one of the following sessions and meet with our project team who will be there to talk through the details of the projects and answer any of your questions:**

2 May (2-7pm)	Kirkton of Skene – Milne Hall
3 May (2-7pm)	Ardoe - Ardoe House Hotel
4 May (2-7pm)	Laurencekirk – Dickson Hall
9 May (2-7pm)	Brechin – Brechin City Hall
10 May (2-7pm)	Kirriemuir – Westmuir Hall
11 May (2-7pm)	Tealing – Tealing Village Hall
17 May (4-6pm)	Virtual event*

\*Joining details available on website

**If you have any questions, please contact the Community Liaison Manager:**
