

Transmission Training Centre

Wed 23 September 3-7pm
The Bothy Function Room
Thainstone Centre, Inverurie

Pre Application Consultation Event

SSEN Transmission is proposing the development of a new purpose-built training facility, known as the SSEN Transmission Training Centre, located at the (Aberdeen & Northern Marts ANM) Thainstone Business Park.

As the electricity network across the north of Scotland grows, this project will help meet changing energy demands and support the transition to a low-carbon future. SSEN Transmission Training Centre represents an investment in the people who plan, operate and support the network, providing a safe, inclusive workplace that promotes wellbeing and modern ways of working.

We are consulting on proposals for the New Training Centre.
Final comments can be submitted until **7 October**.
