

# PUBLIC INFORMATION NOTICE

## Public consultation event for the Knocknagael – Tomatin reinforcement project

Scottish Hydro Electric (SHE) Transmission will be hosting an event to continue public consultations in regards to:

- **Knocknagael to Tomatin** – Construct approx. 20km of 275kV double circuit overhead line between Knocknagael substation and the proposed Tomatin substation on a new alignment.
- **Knocknagael to Farr** – Dismantle the existing 132kV overhead line between the Knocknagael substation and the Farr substation.
- **Tomatin substation** – Construct a new 275kV/132kV substation near Tomatin, adjacent to the existing Beauly to Boat of Garten 132kV double circuit overhead line.
- **Knocknagael substation** – Connect the existing 132kV overhead line from Beauly into Knocknagael via a new sealing end compound (where overhead lines terminate onto underground cables), and connect the proposed Knocknagael to Tomatin 275kV overhead line via a new sealing end compound.

Updates on the grid connection projects for Allt Duine, Glen Kyllachy and Tom Nan Clach wind farms will also be available at this event.

As the licensed owner of the transmission network in the north of Scotland we have a statutory obligation to provide a connection to the network to anyone who needs and applies for one. Through prior consultation with a number of parties, including communities and statutory bodies, we aim to find the best solution for any requested grid connection.

Members of the SHE Transmission development team will host an open doors event where members of the community can drop in at any time to receive information on our current proposals. Details as follows:

**Tuesday 28 July 2015**

**14.00 - 19.00**

**Strathdearn Hall, New building - Findhorn Room**

**Wednesday 29 July 2015**

**14.00 – 19.00**

**Strathnairn Hall, Daviot, Inverness**

If you are unable to attend the event and would like information on the project, please contact:
