Route 4A follows the existing OHL but is through remote and difficult terrain, with designated landscape sensitivities. Better access for construction and maintenance along Route 4B, although the A87 is a highly valued tourist route, with landscape and visual sensitivities, and cultural heritage issues in relation to the Glen Shiel battleground. Route 4C is close to settlements and recreational interests, being close to the loch shore and A87.

**Preferred**
Route 4A (Existing)
