

Dunoon 132kV Overhead Line Rebuild Project

Virtual Consultation Events

SSEN Transmission invites you to share your views with us

What is happening?

SSEN Transmission are launching a Virtual Consultation Exhibition to gain views and feedback on our proposals to replace the existing overhead transmission line between Dunoon Substation and Garelochhead, which connects Dunoon to the wider national grid.

Why is the project required?

The existing overhead line is supported by an old design suite of metal lattice towers (often referred to as pylons) which are coming toward the end of their operational life.

Through studies looking at reconducting the line, we have established a requirement to rebuild the overhead line with different support structures to ensure security of supply.

Further information is available on the project website, where a link to the virtual platform will become available from Monday 2nd November:

<https://www.ssen-transmission.co.uk/projects/dunoon/>

If you have any questions, please do not hesitate to contact the Community Liaison Manager:

Helen Batey

SSEN Transmission, Inveralmond House, 200 Dunkeld Road, Perth, PH1 3AQ (Return address)

Email: helen.batey@sse.com

Phone: 01925 800 833 / 07778 453 993

The team will be available for live chat sessions on:

Tuesday 3rd November
2020

10am – 12.30pm

5pm – 7.30pm

How can I get involved?

The virtual consultation exhibition has been designed to be fully interactive, allowing for presentation of key project information and plans, as well as providing an opportunity to ask questions about the project.

Visitors will be able to engage directly with the project team, via a live text chat function, where they can ask any questions they might have about the project and share their feedback on the current proposals.
